**BACKGROUND:**

LDC §6-112(3) currently permits one ground-mounted or wall-mounted identification sign and one directory sign for schools, churches, day care centers, parks, recreational facilities, libraries and any other similar uses in residential areas permitted by right or special exception in accordance with LDC, Chapter 4. This section of the code also restricts the maximum sign area for such signs to 32 square feet per sign face, requires a 15 foot setback from any property line, and limits the height of any sign to 6 feet. In order to achieve greater proportionality with the lot size on which the sign is located and compatibility with surrounding uses and lot sizes (most of these types of uses are on lot sizes with hundreds of linear feet of frontage), this proposed ordinance would amend the restrictions by increasing the allowed maximum sign area and maximum height and width of the particular identification signs if the use is on property containing more than 400 linear feet of frontage. The restrictions for property with this amount of frontage would be as follows:

1. A maximum sign area of 96 square feet for identification signs; and
2. A limit of 8 feet in height and 12 feet in width for identification signs

This ordinance would also increase consistency with other parts of chapter 6 of the LDC by requiring the same percentages of copy area and architectural features, as well as the same height restriction applying in the Bonita Beach Road Corridor, which is required in other parts of the chapter. The LPA reviewed the ordinance on October 1, 2015, and found it consistent with the comprehensive plan, with changes.
