## **COUNCIL MEMORANDUM**

**TO:** Honorable Mayor McKay and Town Council  
**VIA:** Andrew D. Berns, Town Administrator  
**FROM:** Jeff Katims  
**DATE:** 9/13/2017  
**SUBJECT:** Ordinance Clarifying Mulching Operations and Other Industrial Uses

---

### **Recommendation**

Approve on first reading.

### **Strategic Priorities**

A. Sound Governance

### **Background**

The proposed Ordinance clarifies that producing compost or mulch for use offsite is an industrial use that is permitted only in the Town's "M" Manufacturing and Industrial District. The proposed Ordinance also clarifies and expands the types of recycling and waste processing that is permitted in the M District.

Converting landscape debris into compost or mulch is not a prohibited activity when the materials are used only on the premises in order to support an agricultural use. In this manner, production of compost and mulch are naturally and customarily incidental to the use of land for a plant or tree nursery. Furthermore, mulch may be sold in quantities that are incidental to the sale of trees and plants grown on premises.

However, production of compost and mulch in quantities sufficient to support off-site agriculture, wholesale or retail sale to consumers takes on the characteristics of a primarily commercial or industrial use, and not a primary agricultural use. Production of such quantities

involves acceptance (often at a charge) of yard waste and other landscape debris from lawn maintenance services and other sources, composting or grinding the materials to produce compost or mulch, and then transporting the material offsite.

Compost and mulch are desirable and useful horticultural materials. However, the process of creating the materials can create nuisances for occupants of adjacent properties. The limited quantities involved in accessory production of these materials limits the impacts on adjacent properties.
