The following box must be filled out to be on agenda.	Yes I have notified everyone OR Not applicable in this case ND Please initial one.

Summary Explanation/Background:

This is more of a housekeeping item. The Town of Lake Park’s (contracted) Building Official is Shane Kittendorf with CAP Government, Inc. On December 31, 2023, the 2023 Florida Building Code came into effect. Consequently, our Building Official reviewed and updated the relevant code sections included as Exhibit A of the attached Ordinance and these have been applied to permits since December 31, 2024. A CAP representative will be in attendance at the meeting to answer any questions.

Summary update of changes for Chapter 1 of the Florida Building Code (2023) 8th Edition **Notable Updates and Changes**

- Items listed in **Red** are Legislature adopted
- Items listed in **Blue** are new BOAF model code updates along with other utilized adopted jurisdictional codes to assist with a complete Chapter 1 for the City of Cape Coral. The intent is to provide clarity, uniformity, efficiency and consistency in the application of the policies and procedures to meet compliance with the building code.

Section 101 - SCOPE AND GENERAL REQUIREMENTS

- 101.2 (2) relocation Existing buildings. The provisions of the Florida Existing Building Code along with Chapter 54 of Town Ordinance to section 101.4.7
- 101.2 (2) addition of Code requirements that address snow loads and earthquake protection shall not be utilized or enforced.
- 101.4.7 Existing buildings. The provisions of the Florida Existing Building Code along with Chapter 54 of Town Ordinance shall apply to matters governing the repair, alteration, change of occupancy, addition to and relocation of existing buildings.

Section 104 - DUTIES AND POWERS OF BUILDING OFFICIAL

- 104.11 The provisions of this code are not intended to prevent the installation of any material or to prohibit any design or method of construction not specifically prescribed by this code, provided that any such alternative has been approved by the Building Official.

Section 105 – PERMITS

- 105.3.1.2 Professional Engineer Requirement
 - (2) Fire sprinkler systems under statute 633 have been updated to allow a licensed Fire Sprinkler contractor to design systems to a new threshold of 49 sprinkler heads or alteration of an existing facility up to 249 sprinkler heads before a professional engineer is required.
 - (4) Exception: Simplified Permitting process for Fire Alarm and Fire Sprinkler system only projects which are not part of a larger scope of work. A Complete application submittal is required, except the plans are not required but shall be onsite by the contractor.
- 105.3.1.3 In reviewing applications for a building permit the Jurisdiction shall not request information more than three times.
 - First Round Review Comments – If the applicant returns comments within 30 days, the jurisdiction shall review within 15 days after receiving such information.
 - Second Review Comments – If the applicant returns comments within 30 days, the jurisdiction shall review within 10 days after receiving such information.
 - Before a third request for additional information may be made, the applicant must be offered an opportunity to meet with the local government to attempt to resolve outstanding issues. If the applicant returns comments within 30 days, the jurisdiction shall review within 10 days after receiving such information.

- 105.3.8 A local government may not require a contract between a builder and an owner for the issuance of a building permit or as a requirement for the submission of a building permit application.
- 105.4.1.5 After the local enforcing agency issues a permit, the local enforcing agency may not make or require any substantive changes to the plans or specifications except changes required for compliance with the Florida Building Code, the Florida Fire Prevention Code, or the Life Safety Code, or local amendments thereto.

Section 107 - SUBMITTAL DOCUMENTS

- 107.1 All Data shall be submitted electronically unless approved by the Building Official.
- 107.3.4.0.1 Other than Single-Family Residences. The plans and specifications for new construction, alterations, repairs, improvements, replacements, or additions costing fifteen thousand dollars (\$15,000.00) or more, shall be prepared by, and each sheet shall bear the signature and seal of an Architect or Engineer.
- 107.3.4.0.2 Single-Family Residences. The plans and specifications for new construction, alterations, repairs, improvements, replacements, or additions costing thirty thousand dollars (\$30,000.00) or more, shall be prepared by an Architect or Engineer. Each sheet shall be signed and sealed by the Architect or Engineer.
- 107.3.4.0.3 Plans and specifications for work that is preponderantly of an architectural nature shall be prepared by a Registered Architect, and work that involves extensive computation based on structural stresses shall, in addition, be prepared by a Professional Engineer.
- 107.3.4.0.4 Plans and specifications for work that is preponderantly of a mechanical or electrical nature shall, at the discretion of the Building Official, be prepared by a Professional Engineer.
- 107.3.4.0.5 Compliance with the specific minimum requirements of this Code shall not be deemed sufficient unless determined through rational analysis.
- 107.3.4.0.6 For any work involving structural design, the Building Official may require that plans, calculations, and specifications be prepared by a Professional Engineer, regardless of the cost of such work.
- 107.3.4.0.7 Electrical plans and specifications for new construction shall be prepared by a Professional Engineer if they exceed specific thresholds.
- 107.3.4.0.8 All plans shall be properly digitally signed or properly physically signed per Fs. 471 or Fs. 481.

- 107.7 If the local building code administrator, plans examiner or inspector finds that the plans are not in compliance with the Florida Building Code, the local building code administrator or inspector shall identify the specific plan features that do not comply with the applicable codes, identify the specific code chapters and sections upon which the finding is based, and provide this information to the permit applicant.

Section 109 – FEES

- 109.2.1 Types of Fees Enumerated

Section 110 – INSPECTIONS

- 110.3 The Required Inspections section has been completely revamped to provide clarity, uniformity, efficiency and consistency of the section.
 - Building (7)(7.2) A final survey shall be provided to certify placement of the building on the site, illustrate all surrounding setback dimensions, easements, slopes for proper drainage and shall be available at the job site or submitted electronically for review by the building official.
- 110.12.1 – 110.12.11 Milestone Inspection Program for Condos and Co-Op over 3-stories in height. The Legislature finds that maintaining the structural integrity of a building throughout its service life is of paramount importance in order to ensure that buildings are structurally sound so as to not pose a threat to the public health, safety, or welfare. As such, the Legislature finds that the imposition of a statewide structural inspection program for aging condominium and cooperative buildings in this state is necessary to ensure that such buildings are safe for continued use.

Recommended Motion: I move to APPROVE Ordinance ___-2024 on first reading.

AN ORDINANCE OF THE TOWN COMMISSION OF THE TOWN OF LAKE PARK, FLORIDA, AMENDING CHAPTER 54, ARTICLE I, SECTION 54-8 OF THE TOWN CODE PERTAINING TO THE TOWN’S LOCAL AMENDMENTS TO CHAPTER ONE OF THE FLORIDA BUILDING CODE; PROVIDING FOR THE REPEAL OF LAWS IN CONFLICT ; PROVIDING FOR SEVERABILITY; PROVIDING FOR CODIFICATION; AND PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, in 2023, the Florida Legislature enacted an updated version of the Florida Building Code, amending the minimum building construction standards which must be adopted and applied by all local governments in Florida; and

WHEREAS, the Florida Building Code and amendments thereto which have been enacted by the Legislature are codified in Section 553.73 Florida Statutes; and

WHEREAS, Section 553.73(4)(A) Florida Statutes, authorizes local governments to adopt local amendments to Chapter One of the Florida Building Code that are more stringent than the minimum state standards set forth therein; and

WHEREAS, the Palm Beach County Building Code Advisory Board recommends that all local governments in Palm Beach County adopt said local amendments to create uniformity within the Palm Beach County; and

WHEREAS, the Town’s Building Official recommends that the Town Commission adopt the local amendments prepared and recommended by the Palm Beach County Building Code Advisory Board; and

WHEREAS, the Town Commission has determined that the amendments incorporated herein will promote the health, safety and general welfare of the residents and businesses of the Town of Lake Park.

NOW, THEREFORE, BE IT ORDAINED BY THE TOWN COMMISSION OF THE TOWN OF LAKE PARK, FLORIDA, THAT:

Section 1: Chapter 54. Buildings and Building Regulations of the Code of Ordinances of the Town of Lake Park attached hereto and incorporated herein as **Exhibit “A”** is hereby amended to update references to the Florida Building Code and to adopt local amendments to Chapter 1 of the Florida Building Code; providing that Chapter 54 shall hereafter read as follows:

Section 2. Severability. If any section, subsection, sentence, clause, phrase or portion of this Ordinance is for any reason held invalid or unconstitutional by any court of competent jurisdiction, such portion shall be deemed a separate, distinct and independent provision and such holding shall not affect the validity of the remaining portions thereof.

Section 3. Repeal of Laws in Conflict. All Ordinances or parts of Ordinances in conflict herewith are hereby repealed to the extent of such conflict.

Section 4. Codification. The sections of the Ordinance may be made a part of the Town Code of Laws and Ordinances and may be renumbered or re-lettered to accomplish such, and the word "ordinance" may be changed to "section," "article," or any other appropriate word.

Section 5. Effective Date. This Ordinance shall take effect immediately upon adoption.

Sec. 54-7. - Florida building code adopted.

There is adopted by reference as fully and to the same extent as if set out at length herein the Florida Building Code, as amended from time to time, as the minimum construction standards for the town; one copy shall be kept on file in the office of the town manager, and another copy shall be kept in the department of community development.

(Code 1978, § 7-16; Ord. No. 12-1991, § 1, 8-20-1991; Ord. No. 27-1993, § I, 12-15-1993; Ord. No. 3-1996, § I, 2-21-1996; Ord. No. 3-2005, § 2(7-16), 7-20-2005; Ord. No. 14-2007, § 2, 8-1-2007)

Sec. 54-8. - Chapter One amendments adopted.

CHAPTER ONE—ADMINISTRATION

Section 101. ~~General.~~ Scope and General Requirements

101.1 *Title.* These regulations shall be known as the Florida Building Code hereinafter referred to as "this code."

101.2 *Scope.* The provisions of this code shall apply to the construction, alteration, movement, enlargement, replacement, repair, equipment, use and occupancy, location, maintenance, removal and demolition of every building or structure or any appurtenances connected or attached to such buildings or structures in the Town.

Exceptions:

1. Detached one- and two-family dwellings and multiple single-family dwellings (Townhouses) not more than three stories above grade plane in height with a separate means of egress and their accessory structures shall comply with the Florida Building Code, Residential.
2. ~~Existing buildings undergoing repair, alterations or additions or change of occupancy shall comply with Chapter 54 of this Code. Code requirements that address snow loads and earthquake protection shall not be utilized or enforced.~~

101.2.1 *Appendices.* Provisions in the appendices shall not apply unless specifically adopted. Town of Lake Park has adopted Appendix "Q" in the Florida Building Code, Residential Volume: Tiny Houses and Appendix "F" in the Florida Building Code, Plumbing Volume: Proposed Construction Building Codes for Turf and Landscape Irrigation Systems.

101.2.2 *Florida Building Code, Residential.* Construction standards or practices which are not covered by Florida Building Code, Residential volume shall be in accordance with the provisions of Florida Building Code, Building.

101.3 *Intent.* The purpose of this code is to establish the minimum requirements to safeguard the public health, safety and general welfare through structural strength, means of egress facilities, stability, sanitation, adequate light and ventilation, energy conservation, and safety to life and property from fire and other hazards attributed to the built environment and to provide safety to fire fighters, code officials, and emergency responders during emergency operations.

101.3.1 *Quality Control.* Quality control of materials and workmanship is not within the purview of this code except as it relates to the purposes stated herein.

101.3.2 *Warranty and Liability.* The permitting and inspection of any building, system, or plan by the Town, under the requirements of this code, shall not be construed in any court as a warranty of the physical condition of such building, system, or plan, or their adequacy. The Town shall not be liable in tort for damages or hazardous or illegal condition or inadequacy in such building, system, or plan, nor for any failure of any component of such, which may occur subsequent to such inspection or permitting. Further, no Building Department or

employee shall be liable in tort for damage from such conditions, in accordance with Section 768.28(9)(a) F.S., as may be amended or replaced.

101.4 *Referenced codes.* The other codes listed in Sections 101.4.1 through 101.4.9 and referenced elsewhere in this code shall be considered part of the requirements of this code to the prescribed extent of each such reference.

101.4.1 *Gas.* The provisions of the Florida Building Code pertaining to Fuel Gas shall apply to the installation of gas piping from the point of delivery, gas appliances and related accessories as covered in this code. These requirements apply to gas piping systems extending from the point of delivery to the inlet connections of appliances and the installation and operation of residential and commercial gas appliances and related accessories.

101.4.2 *Mechanical.* The provisions of the Florida Building Code, Mechanical shall apply to the installation, alterations, repairs and replacement of mechanical systems, including equipment, appliances, fixtures, fittings and/or appurtenances, including ventilating, heating, cooling, air-conditioning and refrigeration systems, incinerators and other energy-related systems.

101.4.3 *Plumbing.* The provisions of the Florida Building Code, Plumbing shall apply to the installation, alteration, repair and replacement of plumbing systems, including equipment, appliances, fixtures, fittings and appurtenances, and where connected to a water or sewage system and all aspects of a medical gas system.

101.4.4 *Property maintenance.* The provisions of Chapter 54-8 and Chapter 16 of the Town Code shall apply.

101.4.5 *Fire prevention.* For provisions related to fire prevention, refer to the Florida Fire Prevention Code. The Florida Fire Prevention Code shall apply to matters affecting or relating to structures, processes and premises from the hazard of fire and explosion arising from the storage, handling or use of structures, materials or devices; from conditions hazardous to life, property or public welfare in the occupancy of structures or premises; and from the construction, extension, repair, alteration or removal of fire suppression, automatic sprinkler systems and alarm systems or fire hazards in the structure or on the premises from occupancy or operation.

101.4.6 *Energy.* The provisions of the Florida Building Code, Energy Conservation shall apply to all matters governing the design and construction of buildings for energy efficiency.

101.4.7 Existing buildings. The provisions of the Florida Existing Building Code along with Chapter 54 of Town Ordinance shall apply to matters governing the repair, alteration, change of occupancy, addition to and relocation of existing buildings.

101.4.7(8) *Accessibility.* For provisions related to accessibility, refer to Florida Building Code, Accessibility.

101.4.8(9) *Manufactured buildings.* For additional administrative and special code requirements, see Section 458 of the Florida Building Code, under Building, and Rule 61-41, Florida Administrative Code.

101.4.9(10) *Electrical.* The provisions of Chapter 27 of the Florida Building Code shall apply to the installation of electrical systems, including alterations, repairs, replacement, equipment, appliances, fixtures, fittings and appurtenances thereto.

101.4.10(11) *Flood Damage Prevention.* The Town of Lake Park floodplain management Ordinance codified in Chapter 60 of the Town Code shall be considered part of the requirements of Chapter 54 relative to flood control. Conflicting requirements between the Florida Building Code and Chapter 60 of the Town Code shall be resolved in favor of the requirement that offers the greatest degree of flood damage prevention or alternatives that would provide an equivalent degree of flood damage prevention and an equivalent method of construction.

Section 102. *Applicability.*

102.1 *General.* Where there is a conflict between a general code requirement and a specific code requirement, the specific requirement shall be applicable. Where, in any specific case, different sections of this Chapter 54 specify different materials, methods of construction or other requirements, the most restrictive shall govern.

102.1.1 The Florida Building Code does not apply to, and no code enforcement action shall be brought with respect to, zoning requirements, land use requirements and owner specifications or programmatic requirements which do not pertain to and govern the design, construction, erection, alteration, modification, repair or demolition of public or private buildings, structures or facilities or to programmatic requirements that do not pertain to enforcement of the Florida Building Code. Additionally, a local code enforcement agency may not administer or enforce the Florida Building Code, Building to prevent the siting of any publicly owned facility, including, but not limited to, correctional facilities, juvenile justice facilities, or state universities, community colleges, or public education facilities, as provided by law.

102.2 *Building.* The provisions of the Florida Building Code shall apply to the construction, erection, alteration, modification, repair, equipment, use and occupancy, location, maintenance, removal and demolition of every public and private building, structure or facility or floating structure, or any appurtenances connected or attached to such buildings, structures or facilities. Additions, alterations, repairs and changes of use or occupancy group in all buildings and structures shall comply with the provisions provided in Chapter 54 of this code and the Florida Building Code, Existing Building. The following buildings, structures and facilities, except for those located in a Special Flood Hazard Area, are exempt from the Florida Building Code as provided by law, and any further exemptions shall be as determined by the legislature and provided by law:

- (a) Building and structures specifically regulated and preempted by the federal government.
- (b) Railroads and ancillary facilities associated with the railroad.
- (c) Nonresidential farm buildings on farms.
- (d) Temporary buildings or sheds used exclusively for construction purposes.
- (e) Mobile or modular structures used as temporary offices, except that the provisions of Part II (Sections 553.501-553.513, F.S.) relating to accessibility by persons with disabilities. Permits shall be required for structural support and tie down, electrical supply, and utility connections to such mobile or modular structures, as required by this jurisdiction.
- (f) Those structures or facilities of electric utilities, as defined in Section 366.02, F.S., which are directly involved in the generation, transmission or distribution of electricity.
- (g) Temporary sets, assemblies or structures used in commercial motion picture or television production, or any sound-recording equipment used in such production, on or off the premises.
- (h) Chickees constructed by the Miccosukee Tribe of Indians of Florida or the Seminole Tribe of Florida. As used in this paragraph, the term "chickee" means an open-sided wooden hut that has a thatched roof of palm or palmetto or other traditional materials, and that does not incorporate any electrical, plumbing, or other nonwood features.
- (i) Family mausoleums not exceeding 250 square feet (23m²) in area which are prefabricated and assembled on site or preassembled and delivered on site and have walls, roofs, and a floor constructed of granite, marble, or reinforced concrete.
- (j) Temporary housing provided by the Department of Corrections to any prisoner in the state correctional system.
- (k) A building or structure having less than 1,000 square feet (93 m²) which is constructed and owned by a natural person for hunting and which is repaired or reconstructed to the

same dimensions and condition as existed on, or prior to January 1, 2011, if the building or structure:

1. Is not rented or leased or used as a principal residence;
 2. Is not located within the 100-year floodplain according to the Federal Emergency Management Agency's current Flood Insurance Rate Map; and
 3. Is not connected to an off-site electric power or water supply.
- (l) A drone port as defined in s. 330.41(2).
- (M) Service or utility providers of water, sewer, storm, gas, cable, telephone, or other similar utility systems are exempt to the point of service connection for the building or structure.

However, these structures may be subject to local zoning and/or land development regulations.

102.2.1 In addition to the requirements of Section 553.79 and 553.80, F.S., facilities subject to the provisions of Chapter 395, F.S. (Hospital Licensing and Regulation), and Chapter 400, F.S. Parts II and VIII (Nursing Homes), shall have facility plans reviewed and construction surveyed by the state agency authorized to do so under the requirements of Chapter 395, F.S., and Part II of Chapter 400, F.S., and the certification requirements of the federal government.

102.2.2 Residential Buildings or structures moved into or the Town shall not be required to be brought into compliance with the state minimum building code in force at the time the building or structure is moved, provided:

1. The building or structure is structurally sound and is in occupiable condition for its intended use;
2. The occupancy use classification for the building or structure is not changed as a result of the move;
3. The building is not substantially remodeled;
4. Current fire code requirements for ingress and egress are met;
5. Electrical, gas and plumbing systems meet the codes in force at the time of original construction and are operational and safe for reconnection;
6. Foundation plans are sealed by a professional engineer or architect licensed to practice in this state, if required by the applicable Florida Statutes for all buildings or structures of the same residential occupancy class; and
7. The requirements of Florida Building Code, Existing Building Volume, are also satisfied.

102.2.3 The building official shall apply the same standard to a moved residential building or structure as that applied to the remodeling of any comparable residential building or structure to determine whether the moved structure is substantially remodeled. The cost of the foundation on which the moved building or structure is placed shall not be included in the cost of remodeling for purposes of determining whether a moved building or structure has been substantially remodeled.

102.2.4 This section does not apply to the jurisdiction and authority of the Department of Agriculture and Consumer Services to inspect amusement rides or the Department of Financial Services to inspect state-owned buildings and boilers.

102.2.5 Each enforcement district or local enforcement agency shall be governed by a board, the composition of which shall be determined by the affected localities.

1. At its own option, each enforcement district or local enforcement agency may adopt rules granting to the owner of a single-family residence one or more exemptions from the Florida Building Code relating to:
 - a. Addition, alteration, or repairs performed by the property owner upon his or her own, provided any addition or alteration or repair shall not exceed 1,000 square foot (93m²) or the square footage of the of the primary structure, whichever is less.
 - b. Addition, alteration, or repairs by a non-owner within a certain cost limitation set by rule, provided the total cost shall not exceed \$5,000 within any 12 month period.
 - c. Building plan review and inspection fees.
 2. However, the exemptions under subparagraph 1 do not apply to single-family residences that are located in mapped flood hazard areas, as defined in the code, unless the enforcement district or local enforcement agency has determined that the work, which is otherwise exempt, does not constitute a substantial improvement, including the repair of substantial damage, of such single-family residences.
 3. Each code exemption, as defined in sub-subparagraphs 1a, 1b., and 1c shall be certified to the local board 10 days prior to implementation and shall only be effective in the territorial jurisdiction of the enforcement district or local enforcement agency implementing it.
 4. However, each enforcement district or local enforcement agency may establish an alternative permitting program for replacing nonstructural components of building systems in a residential dwelling unit. A licensed contractor performing such work for the resident shall also be exempt from individual permits and inspections if either the owner or the licensed contractor obtains a valid Annual Permit per Section 105.1.1 of this Code and all such work is reported as required in Section 105.1.2 of this Code for compliance evaluation. No added capacity, system expansion or new building work of any type shall be excluded from individual permit and inspection by this provision.
- 102.2.6 This Code does not apply to traditional swings and other playground equipment accessory to a one- or two-family dwelling, as determined by the building official. Exempt structures covered under this section may still be subject to zoning permits.
- Exception:* Electrical service to such playground equipment shall be in accordance with Chapter 27 of this code.
- 102.3 *Application of references.* References to chapter or section numbers, or to provisions not specifically identified by number, shall be construed to refer to such chapter, section or provision of this code.
- 102.4 *Referenced codes and standards.* The codes and standards referenced in this code shall be considered part of the requirements of this code to the prescribed extent of each such reference and as further regulated in Sections 102.4.1 and 102.4.2.
- 102.4.1 *Conflicts.* Where a conflict occurs between provisions of this code and other codes and standards referenced herein, the provisions of this Chapter 54 shall apply.
- 102.4.2 *Provisions in referenced codes and standards.* Where the extent of the provisions to a referenced code or standard includes subject matter that is within the scope of this Chapter 54 or the Florida Codes listed in Section 101.4, the provisions of this Chapter 54 or the Florida Codes listed in Section 101.4, as applicable, shall take precedence over the provisions in a referenced code or standard.
- 102.5 *Partial invalidity (Reserved FBC).* In the event that any part or provision of this code is held to be illegal or void, this shall not have the effect of making void or illegal any of the other parts or provisions.

102.6 *Existing structures.* The legal occupancy of any structure existing on the date of adoption of this code shall be permitted to continue without change, except as is specifically provided in this code, the Florida Building Code, Existing -Building, the Florida Fire Prevention Code, or the Property Maintenance Code.

102.6.1 *Buildings not previously occupied.* A building or portion of a building that has not been previously occupied or used for its intended purpose in accordance with the laws in existence at the time of its completion shall comply with the provisions of the Florida Building Code or Florida Residential Code, as applicable, for new construction or with any current permit for such occupancy.

102.6.2 *Buildings previously occupied.* The legal occupancy of any structure existing on the date of adoption of the Town Code shall be permitted to continue without change, except as is specifically covered in this code, Town property maintenance Chapter 54 and Chapter 16, the Codes referenced in Section 101.4, or the Florida Fire Prevention Code, or as is deemed necessary by the building official for the general safety and welfare of the occupants and the public.

102.7 *Relocation of manufactured buildings.*

1. Relocation of an existing manufactured building does not constitute an alteration.
2. A relocated building shall comply with wind speed requirements of the new location, using the appropriate wind speed map. If the existing building was manufactured in compliance with the Standard Building Code (prior to March 1, 2002), the wind speed map of the Standard Building Code shall be applicable. If the existing building was manufactured in compliance with the Florida Building Code (on or after March 1, 2002), the wind speed map of the Florida Building Code shall be applicable.
3. A relocated building shall comply with the flood hazard area requirements of the new location, if applicable

102.8 *Existing mechanical equipment.* The Town may not require that existing mechanical equipment located on or above the surface of a roof be installed in compliance with the requirements of the Florida Building Code until the equipment is being replaced or moved during reroofing and is not in compliance with the provisions of the Florida Building Code relating to roof-mounted mechanical units.

Section 103. *Building Division.*

103.1 *Establishment.* There is hereby established a division within the Town's Community Development Department to be called the Building Division and the person in charge shall be known as the Building Official. All code officials employed by the division shall be certified in accordance with Chapter 468, Part XII, F.S.

103.2 *Restrictions on employees.* An officer or employee connected with the department, except one whose only connection is as a member of the board established by this code, shall not be financially interested in the furnishing of labor, material, or appliances for the construction, alteration, or maintenance of a building, structure, service, system, or in the making of plans or of specifications thereof, unless he/she is the owner of such. This officer or employee shall not engage in any other work which is inconsistent with their duties or conflict with the interests of the department, except as instructors.

Section 104. *Duties and Powers of The Building Official.*

104.1 *General.* The building official is hereby authorized and directed to enforce the provisions of this code. The building official shall have the authority to render interpretations of this code, and to adopt policies and procedures in order to clarify the application of its provisions. Such interpretations, policies and procedures shall be in compliance with the intent and purpose of this code. Such policies and procedures shall not have the effect of waiving requirements specifically provided for in this code.

- 104.2 *Applications and permits.* The building official shall receive applications, review construction documents and issue permits for the erection, and alteration, demolition and moving of buildings, structures, and service systems, inspect the premises for which such permits have been issued and enforce compliance with the provisions of this code.
- 104.2.1 *Determination of substantially improved or substantially damaged existing buildings and structures in flood hazard areas.* For applications for reconstruction, rehabilitation, repair, alteration, addition or other improvement of existing buildings or structures located in flood hazard areas, the building official shall determine if the proposed work constitutes substantial improvement or repair of substantial damage. Where the building official determines that the proposed work constitutes substantial improvement or repair of substantial damage, and where required by this code, the building official shall require the building to meet the requirements of Sections 1612 or R322 of this code, and the Town of Lake Park floodplain management Ordinance codified in Chapter 60 of the Town Code
- 104.3 *Notices and orders.* The building official shall issue all necessary notices or orders to ensure compliance with this code.
- 104.4 *Inspections.* The building official shall make all of the required inspections, or the building official shall have the authority to accept reports of inspection by approved agencies or individuals. Reports of such inspections shall be in writing and be certified by a responsible officer of such approved agency or by the responsible individual. The building official is authorized to engage such expert opinion as deemed necessary to report upon unusual technical issues that arise, subject to the approval of the appointing authority.
- 104.5 *Identification.* The building official shall carry proper identification, as issued by the Town, when inspecting structures or premises in the performance of duties under this code.
- 104.6 *Right of entry.*
- 104.6.1 Where it is necessary to make an inspection to enforce any of the provisions of this code, or where the building official has reasonable cause to believe that there exists in any building or upon any premises any condition or code violation which makes such building, structure, or premises, unsafe, dangerous or hazardous, the building official is authorized to enter the building, structure or premises at all reasonable times to inspect or to perform any duty imposed by this code, provided that if such building, structure or premises are occupied, that credentials be presented to the occupant and entry requested. If such building, structure, or premises are unoccupied, the building official shall first make a reasonable effort to locate the owner or other persons having charge or control of the building, structure, or premises, and request entry. If entry is refused, the building official shall have recourse to every remedies provided by law to secure entry.
- 104.6.2 When the building official has first obtained a proper inspection warrant in accordance with Chapter 933, F.S. or other remedy provided by law to secure entry, no owner or occupant or any other persons having charge, care or control of any building, structure, or premises shall fail or neglect, after proper request is made as herein provided, to promptly permit entry therein by the building official for the purpose of inspection and examination pursuant to this code.
- 104.7 *Department records.* The Town's building department shall keep official records of applications received, permits and certificates issued, fees collected, reports of inspections, and notices and orders issued. Such records shall be retained in the official records for the period required for retention of public records per Chapter 119, F.S.
- 104.8 *Liability.* The building official, contracted service consultant, any member of the board of appeals or employee charged with the enforcement of this code, while acting for the Town in good faith and without malice in the discharge of the duties required by this code or other pertinent law or ordinance, shall not thereby be rendered liable personally and is hereby relieved from personal liability for any damage accruing to persons or property as a result of any

act or by reason of an act or omission in the discharge of official duties. Any suit instituted against an officer or contracted service consultant or employee or member because of an act performed by that officer or contracted service consultant or employee or member in the lawful discharge of duties and under the provisions of this code shall be defended by legal representative of the Town until the final termination of the proceedings. The building official or any subordinate shall not be liable for cost in any action, suit or proceeding that is instituted in pursuance of the provisions of this code.

104.9 *Approved materials and equipment.* Materials, equipment and devices approved by the building official shall be constructed and installed in accordance with such approval.

104.9.1 *Used materials and equipment.* The use of used, recycled, or reclaimed materials which meet the requirements of this code for new materials is permitted. Used equipment and devices shall not be reused unless approved by the building official.

104.10 *Modifications.* Wherever there are practical difficulties involved in carrying out the provisions of this code, the building official shall have the authority to grant modifications for individual cases, upon application of the owner or owner's representative, provided the building official shall first find that special individual reason makes the strict letter of this code impractical and the modification is in compliance with the intent and purpose of this code and that such modification does not lessen health, accessibility, life and fire safety, or structural requirements. The details of action granting modifications shall be recorded and entered in the files of the building department.

104.10.1 (Reserved FBC) Flood hazard areas. The Building Official shall not grant modifications to any provision required in flood hazard areas as established by Section 1612.3 unless a determination has been made that:

1. A showing of good and sufficient cause that the unique characteristics of the size, configuration or topography of the site render the elevation standards of Section 1612 inappropriate.
2. A determination that failure to grant the variance would result in exceptional hardship by rendering the lot undevelopable.
3. A determination that the granting of a variance will not result in increased flood heights, additional threats to public safety, extraordinary public expense, cause fraud on or victimization of the public, or conflict with existing laws or ordinances.
4. A determination that the variance is the minimum necessary to afford relief, considering the flood hazard.
5. Through written evidence by the Applicant, the difference between the design flood elevation and the elevation to which the building is to be built; a statement that the cost of flood insurance will be commensurate with the increased risk resulting from the reduced floor elevation; and stating that construction below the design flood elevation increases risks to life and property.

~~104.11 *Alternative materials, design and methods of construction and equipment.* The provisions of this code are not intended to prevent the installation of any material or to prohibit any design or method of construction not specifically prescribed by this code, provided that any such alternative has been approved. An alternative material, design or method of construction shall be approved where the building official finds that the proposed design is satisfactory and complies with the intent of the provisions of this code, and that the material, method or work offered is, for the purpose intended, at least the equivalent of that prescribed in this code in quality, strength, effectiveness, fire resistance, durability and safety.~~

104.11 *Alternative materials, design and methods of construction and equipment.* The provisions of this code are not intended to prevent the installation of any material or to prohibit any design or method of construction not specifically prescribed by this code, provided that any such alternative has been approved. An alternative material, design or method of construction shall

be approved where the building official finds that the proposed alternative meets all of the following:

1. The alternative material, design or method of construction is satisfactory and complies with the intent of the provisions of this code; and

2. The material, method or work offered is, for the purpose intended, not less than the equivalent of that prescribed in this code as it pertains to the following:

- 2.1 Quality.
- 2.2 Strength
- 2.3 Effectiveness
- 2.4 Fire Resistance
- 2.5 Durability
- 2.6 Safety
- 2.7 Level of Sanitation

Where the alternative material, design or method of construction is not approved, the building official shall respond in writing, stating the reasons why the alternative was not approved.

104.11.1 *Research reports.* Supporting data, where necessary to assist in the approval of materials or assemblies not specifically provided for in this code, shall consist of valid research reports from approved sources.

104.11.2 *Tests.* Whenever there is insufficient evidence of compliance with the provisions of this code, or evidence that a material or method does not conform to the requirements of this code, or in order to substantiate claims for alternative materials or methods, the building official shall have the authority to require tests as evidence of compliance to be made at no expense to the jurisdiction. Test methods shall be as specified in this code or by other recognized test standards. In the absence of recognized and accepted test methods, the building official shall approve the testing procedures. Tests shall be performed by an approved agency. Reports of such tests shall be retained by the building official for the period required for retention of public records.

104.12 *Requirements not covered by code.* Any requirements necessary for the strength, stability or proper operation of an existing or proposed building, structure, electrical, gas, mechanical or plumbing system, or for the public safety, health and general welfare, not specifically covered by this or the other technical codes, shall be determined by the building official.

Section 105. *Permits.*

105.1 *Required.* Any contractor, owner, or agent authorized in accordance with Chapter 489, F.S. who intends to construct, enlarge, alter, repair, move, demolish, or change the occupancy of a building, tenancy or structure, or to erect, install, enlarge, alter, repair, remove, convert or replace any impact-resistant coverings, electrical, gas, mechanical, plumbing or fire protection system, or accessible or flood resistant site element, the installation of which is regulated by this code, the Town of Lake Park floodplain management Ordinance codified in Chapter 60 of the Town Code, or to cause any such work to be done, shall first make application to the building official and obtain the required permit.

105.1.1 *Annual facility permit.* In lieu of an individual permit for each alteration to an existing electrical, gas, mechanical, plumbing or interior nonstructural office system(s), the building official is authorized to issue an annual permit for any occupancy to facilitate routine or emergency service, repair, refurbishing, minor renovations of service systems, or manufacturing equipment installations/relocations. The building official shall be notified of major changes and shall retain the right to make inspections at the facility site as deemed

necessary. An annual facility permit shall be assessed with an annual fee and shall be valid for one year from date of issuance. A separate permit shall be obtained for each facility and for each construction trade, as applicable. The permit application shall contain a general description of the parameters of work intended to be performed during the year.

105.1.2 *Annual facility permit records.* The person to whom an annual permit is issued shall keep a detailed record of alterations made under such annual permit. The building official shall have access to such records at all times or such records shall be filed with the building official as designated. The building official is authorized to revoke such permit, and deny future annual permits, if code violations are found to exist.

105.1.3 *Food permit.* As per Section 500.12, F.S., a food permit from the Department of Agriculture and Consumer Services is required of any person who operates a food establishment or retail store.

105.1.4 *Public swimming pool.* The Town may not issue a building permit to construct, develop, or modify a public swimming pool without having first received an application, whether complete or incomplete, for an operating permit pursuant to Section 514.031, Florida Statutes. A certificate of completion or occupancy may not be issued until such operating permit is issued. The town shall conduct a review of the building permit application upon filing and in accordance with Chapter 553, Florida Statutes. The town may confer with the Department of Health, if necessary but may not delay the building permit application review while awaiting comment from the Department of Health.

105.2 *Work exempt from permit.* Exemptions from permit requirements of this code shall not be deemed to grant authorization for any work to be done in any manner in violation of the provisions of this code or any other laws or ordinances of this jurisdiction, to include work in any special flood hazard area. Exemptions granted under this section do not relieve the owner or contractor from their duty to comply with applicable provisions of the Florida Building Code and requirements of the Town's Floodplain Ordinance. As determined by the building official, permits shall not be required for the following:

Building:

1. Building permits are not required for replacement or repair work having value of less than \$1,000.00, providing, however, that such work will not adversely affect the structural integrity, fire rating, exit access, egress, or any local zoning requirements.
2. Painting, papering, tiling, carpeting, cabinets, counter tops and similar finish work, with no electrical or plumbing work for one and two-family dwellings.
3. Temporary motion picture, television and theater sets and scenery.
4. Traditional swings and other standard playground equipment accessory to detached one- and two-family dwellings, but they may be subject to Zoning permits.
5. Retractable awnings supported by an exterior wall and do not require additional support or electric in Residential (one and two-family), Groups R-3 and U occupancies, but they may be subject to Zoning permits.
6. Non fixed and movable fixtures, cases, racks, and counters not over 5 feet 9 inches (1753 mm) in height.

Electrical:

1. Repairs and maintenance: Repair or replacement of like common household electrical fixtures, switches, and outlets on the load side of the electrical source. Minor repair work, including the replacement of lamps or the connection of approved portable electrical equipment to approved permanently installed receptacles.
2. Radio and television transmitting stations: The provisions of this code shall not apply to electrical equipment used for radio and television transmissions, but do apply to equipment

and wiring for a power supply and the installations of towers and antennas, except as exempted by Florida Statute Chapter 489.503(14).

3. Temporary testing systems: A permit shall not be required for the installation of any temporary system required for the testing or servicing of electrical equipment or apparatus.

Gas:

1. Portable heating appliance.
2. Replacement of any minor part that does not alter approval of equipment or make such equipment unsafe.

Mechanical:

1. Portable heating appliance.
2. Portable ventilation equipment.
3. Portable cooling unit.
4. Steam, hot or chilled water piping within any heating or cooling equipment regulated by this code.
5. Replacement of any part which does not alter its approval or make it unsafe.
6. Portable evaporative cooler.
7. Self-contained refrigeration system containing 10 pounds (4.54 kg) or less of refrigerant and actuated by motors of 1 horsepower (746 W) or less.
8. The installation, replacement, removal or metering of any load management control device where installed by a utility service provider.

Plumbing:

1. The stopping of leaks in drains, water, soil, waste or vent pipe provided, however, that if any concealed trap, drain pipe, water, soil, waste or vent pipe becomes defective and it becomes necessary to remove and replace the same with new material, such work shall be considered as new work and a permit shall be obtained and inspection made as provided in this code.
2. The clearing of stoppages or the repairing of leaks in pipes, valves or fixtures, and the removal and reinstallation of water closets, provided such repairs do not involve or require the replacement or rearrangement of valves, pipes or fixtures.
3. The replacement of common household plumbing fixtures to existing supply lines and outlets in one- and two-family dwellings. This does not include water heaters bathtubs, and showers.

105.2.1 *Emergency repairs.* Where equipment replacements and repairs must be performed in an emergency situation, the permit application shall be submitted within the next working business day to the building official. Notification shall be given to the building official including the work address, nature of emergency and scope of work immediately, or by next business day.

105.2.2 *Minor repairs.* Ordinary minor repairs or installation of replacement parts may be made with the approval of the building official, without a permit, provided the repairs do not include the cutting away of any wall, partition or portion thereof, the removal or cutting of any structural beam or load-bearing support, or the removal or change of any required means of egress, or rearrangement of parts of a structure affecting the egress requirements; nor shall ordinary minor repairs include addition to, alteration of, replacement or relocation of any standpipe, water supply, sewer, drainage, drain leader, gas, soil, waste, vent or similar piping, electric wiring systems or mechanical equipment or

other work affecting public health or general safety, and such repairs shall not violate any of the provisions of the technical codes.

105.2.3 *Public service agencies.* (Reserved FBC) A permit shall not be required for the installation, alteration or repair of generation, transmission, distribution or metering or other related equipment that is under the ownership and control of public service agencies by established right.

105.3 *Application for permit.* To obtain a permit, the applicant shall first file an application therefore in writing on a form furnished by the department for that purpose.

Permit application forms shall be in the format prescribed by a local administrative board, if applicable, and must otherwise comply with the requirements of Sections 713.135(5) and (6), F.S.

Each application shall be inscribed with the date of application, and the code in effect as of that date. For a building permit for which an application is submitted prior to the effective date of the Florida Building Code, the state minimum building code in effect in the Town on the date of the application governs the permitted work for the life of the permit and any extension granted to the permit.

Effective October 1, 2017, a local enforcement agency shall post each type of building permit application on its website. Completed applications must be able to be submitted electronically to the appropriate building department. Accepted methods of electronic submission include, but are not limited to, e-mail submission of applications in portable document format or submission of applications through an electronic fill-in form available on the building department's website or through a third-party submission management software. Payments, attachments, or drawings required as part of the permit application may be submitted in person in a nonelectronic format, at the discretion of the building official.

105.3.1 *Action on application.* Except for applications filed without the prerequisite fees, the building official shall examine or cause to be examined applications for permits and amendments thereto within a reasonable time after filing. No review will be performed prior to receipt of required submittal fees. If submittal fees are not paid within ten (10) days of receipt of an application, the application shall become null and void. If the application or the construction documents do not conform to the requirements of pertinent laws, the building official shall reject such application in writing, stating the reasons therefore. If the building official is satisfied that the proposed work conforms to the requirements of this code and laws and ordinances applicable thereto, the building official shall issue a permit therefore as soon as practicable. When authorized through contractual agreement with a school board, in acting on applications for permits, the building official shall give first priority to any applications for the construction of, or addition or renovation to, any school or educational facility.

105.3.1.1 If a state university, Florida college or public school district elects to use the Town's code enforcement offices, fees charged by the Town for enforcement of the Florida Building Code on buildings, structures, and facilities of state universities, state colleges and public school districts shall not be more than the actual labor and administrative costs incurred for plans review and inspections to ensure compliance with the code.

105.3.1.2 No permit may be issued for any building construction, erection, alteration, modification, repair, or addition unless the applicant for such permit provides to Town any of the following documents which apply to the construction for which the permit is to be issued and which shall be prepared by or under the direction of an engineer registered under Chapter 471, F.S.:

1. Plumbing documents for any new building or addition which requires a plumbing system with more than 250 fixture units or which costs more than \$125,000.

2. Fire sprinkler documents for any new building or addition which includes a fire sprinkler system which contains 50 or more sprinkler heads. Personnel as authorized by chapter 633 Florida Statutes, may design a new fire sprinkler protection system of 49 or fewer heads~~sprinklers; and~~ may design the alteration of an existing fire sprinkler system if the alteration consists of the relocation, addition or deletion of 249 or fewer sprinklers and the addition of up to 49 sprinklers, as long as the cumulative total number of fire sprinklers being added, relocated, or deleted does not exceed 249, notwithstanding the size of the existing fire sprinkler system; or may design the alteration of an existing fire sprinkler system if the alteration consists of the relocation or deletion of 249 or fewer sprinklers, notwithstanding the size of the existing fire sprinkler system, if there is no change of occupancy of the affected areas, as defined in this Code and the Florida Fire Prevention Code, and there is no change in the water demand as defined in NFPA 13, "Standard for the Installation of Sprinkler Systems," and if the occupancy hazard classification as defined in NFPA 13 is reduced or remains the same as a result of the alteration.~~not more than 49 heads, notwithstanding the size of the existing fire sprinkler system.~~
3. Heating, ventilation, and air-conditioning documents for any new building or addition which requires more than a 15-ton-per-system capacity which is designed to accommodate 100 or more persons or for which the system costs more than \$125,000. This paragraph does not include any document for the replacement or repair of an existing system in which the work does not require altering a structural part of the building or for work on a residential one, two, three or four-family structure.

An air-conditioning system may be designed by an installing air-conditioning contractor certified under Chapter 489, Florida Statutes, to serve any building or addition which is designed to accommodate fewer than 100 persons and requires an air-conditioning system with a value of \$125,000 or less; and when a 15-ton-per system or less is designed for a singular space of a building and each 15-ton system or less has an independent duct system. Systems not complying with the above require design documents that are to be sealed by a professional engineer.

Example 1: When a space has two 10-ton systems with each having an independent duct system, the contractor may design these two systems since each unit (system) is less than 15 tons.

Example 2: Consider a small single-story office building which consists of six individual offices where each office has a single three-ton package air conditioning heat pump. The six heat pumps are connected to a single water cooling tower. The cost of the entire heating, ventilation and air-conditioning work is \$47,000 and the office building accommodates fewer than 100 persons. Because the six mechanical units are connected to a common water tower this is considered to be an 18-ton system.

NOTE: It was further clarified by the Commission that the limiting criteria of 100 persons and \$125,000 apply to the building occupancy load and the cost for the total air-conditioning system of the building.

4. Any specialized mechanical, electrical, or plumbing document for any new building or addition which includes a medical gas, oxygen, steam, vacuum, toxic air filtration, halon, or fire detection and alarm system which costs more than \$5,000.

Exception:

Simplified permitting process for fire alarm system projects. —

- (1) As used in this section, the term:
- (a) "Component" means valves, fire sprinklers, escutcheons, hangers, compressors, or any other item deemed acceptable by the local enforcing agency. For purposes of this paragraph, a valve does not include pressure-regulating, pressure-reducing, or pressure-control valves.
- (b) "Contractor" means a person who:
1. Is qualified to engage in the business of electrical or alarm system contracting pursuant to a certificate or registration issued by the department under part II of chapter 489, Florida Statutes; or
 2. Is qualified to engage in the business of fire protection system contracting pursuant to a license or certificate issued by the State Fire Marshal.
- (c) "Fire alarm system project" means a fire alarm system alteration of a total of 20 or fewer initiating devices and notification devices, or the installation or replacement of a fire communicator connected to an existing fire alarm control panel in an existing commercial, residential, apartment, cooperative, or condominium building.
- (d) "Fire sprinkler system project" means a fire protection system alteration of a total of 20 or fewer fire sprinklers in which the sprinklers are of the same K-factor and located in spaces where there is no change of hazard classification or increased system coverage area, or the installation or replacement of an equivalent fire sprinkler system component in an existing commercial, residential, apartment, cooperative, or condominium building. For purposes of this paragraph, a component is equivalent if the component has the same or better characteristics, including electrical, hydraulic, pressure losses, and required listings and spacing as the component being replaced.
- (2) (a) A local enforcement agency may require a contractor, as a condition of obtaining a permit for a fire alarm system project or fire sprinkler system project, to submit a completed application and payment.
- (b) A local enforcement agency may not require a contractor to submit plans or specifications as a condition of obtaining a permit for a fire alarm system project or fire sprinkler system project.
- (3) A local enforcement agency must issue a permit for a fire alarm system project or a fire sprinkler system project in person or electronically.
- (4) A local enforcement agency must require at least one inspection of a fire alarm system project or fire sprinkler system project to ensure compliance with applicable codes and standards. If a fire alarm system project or fire sprinkler system project fails an inspection, the contractor must take corrective action as necessary to pass inspection.
- (5) (a) For a fire sprinkler alarm system project, a contractor must keep a copy of the plans and specifications at a fire alarm system project worksite and make such plans and specifications available to the inspector at each inspection.
- (b) For a fire sprinkler system project to alter an existing fire protection system, a contractor must keep a copy of the plans and specifications at the fire sprinkler system project worksite and make

such plans and specifications available to the inspector at each inspection.

(c) For a fire sprinkler system project to install or replace a component, a contractor must keep a copy of the manufacturer's installation instructions and any pertinent testing instructions needed to certify or accept the component at the fire sprinkler system project worksite and make such documents available to the inspector at each inspection.

5. Electrical documents. See Florida Statutes, Section 471.003(2)(h) Any electrical or plumbing or air-conditioning and refrigeration system meeting the following thresholds are required to be designed by a Florida Registered Engineer. The system, Requires an electrical system with a value of over \$125,000; and Requires an aggregate service capacity of over 600 amperes (240 volts) on a residential electrical system or over 800 amperes (240 volts) on a commercial or industrial electrical system;

NOTE: It was further clarified by the Commission that the limiting factor of 240 volt or over is required to be designed by an Engineer.

Documents requiring an engineer seal by this part shall not be valid unless a professional engineer who possesses a valid certificate of registration has signed, dated, and stamped such document as provided in Section 471.025, Florida Statutes.

6. All public swimming pools and public bathing places defined by and regulated under Chapter 514, Florida Statutes

105.3.1.3 Reviewing application for building permit.

1. When reviewing an application for a building permit, a local government may not request additional information from the applicant more than three times, unless the applicant waives such limitation in writing.

2. If a local government requests additional information from an applicant and the applicant submits the requested additional information to the local government within 30 days after receiving the request, the local government must, within 15 days after receiving such information:

- a. Determine if the application is properly completed;
- b. Approve the application;
- c. Approve the application with conditions;
- d. Deny the application; or
- e. Advise the applicant of information, if any, that is needed to deem the application properly completed or to determine the sufficiency of the application.

3. If a local government makes a second request for additional information from the applicant and the applicant submits the requested additional information to the local government within 30 days after receiving the request, the local government must, within 10 days after receiving such information:

- a. Determine if the application is properly completed;
- b. Approve the application;
- c. Approve the application with conditions;
- d. Deny the application; or
- e. Advise the applicant of information, if any, that is needed to deem the application properly completed or to determine the sufficiency of the application.

4. Before a third request for additional information may be made, the applicant must be offered an opportunity to meet with the local government to attempt to resolve outstanding issues. If a local government makes a third request for additional information from the applicant and the applicant submits the requested additional information to the local government within 30 days after receiving the request, the local government must, within 10 days after receiving such information unless the applicant waived the local government's limitation in writing, determine that the application is complete and:

- a. Approve the application;
- b. Approve the application with conditions; or
- c. Deny the application.

5. If the applicant believes the request for additional information is not authorized by ordinance, rule, statute, or other legal authority, the local government, at the applicant's request, must process the application and either approve the application, approve the application with conditions, or deny the application.

- 105.3.2 *Time limitation of application.* An application for a permit for any proposed work shall be deemed to have been abandoned and ~~shall become~~ null and void if required application fees are not paid within 10 calendar days of filing, or 180 days after the date of filing, unless the Building Official determines that such application has been pursued in good faith or that the permit was properly issued. The Building Official is authorized to grant one or more extensions of time for additional periods not exceeding 90 days each. The extension shall be requested by a written request prior to the abandonment date, which includes the justification for the extension. Abandoned applications shall be subject to destruction in accordance with state law. The fee for extension of a permit application shall be set forth by the administrative authority. There may be fees or requirements from other government agencies for permit application extensions.
- 105.3.3 An enforcing authority may not issue a building permit for any building construction, erection, alteration, modification, repair or addition unless the permit either includes on its face or there is attached to the permit the following statement: "NOTICE: In addition to the requirements of this permit, there may be additional restrictions applicable to this property that may be found in the public records of this county such as the requirement for Home or Property Owners Association approval, and there may be additional permits required from other governmental entities such as water management districts, state agencies or federal agencies."
- 105.3.4 A building permit for a single-family residential dwelling must be issued within 30 working days of application therefore unless unusual circumstances require a longer time for processing the application or unless the permit application fails to satisfy the Florida Building Code or the Town's laws or ordinances.
- 105.3.5 Identification of minimum premium policy. Except as otherwise provided in Chapter 440, F.S., Workers' Compensation, every employer shall, as a condition to receiving a building permit, show proof that it has secured compensation for its employees as provided in Sections 440.10 and 440.38, F.S.
- 105.3.6 *Asbestos removal contractor exemption.* Refer to Section 105.9 of this code for additional requirements. A licensed asbestos removal contractor is not required when moving, removal or disposal of asbestos-containing materials on a residential building where the owner occupies the building, the building is not for sale or lease, and the work is

performed according to the owner-builder limitations provided in this paragraph and Florida Statutes Chapter 489.103(7). To qualify for exemption under this paragraph, an owner must personally appear and sign the building permit application. The permitting agency shall provide the person with a disclosure statement in substantially the following form:

Disclosure Statement: State law requires asbestos abatement to be done by licensed contractors. You have applied for a permit under an exemption to that law. The exemption allows you, as the owner of your property, to act as your own asbestos abatement contractor even though you do not have a license. You must supervise the construction yourself. You may move, remove or dispose of asbestos-containing materials on a residential building where you occupy the building and the building is not for sale or lease, or the building is a farm outbuilding on your property. If you sell or lease such building within 1 year after the asbestos abatement is complete, the law will presume that you intended to sell or lease the property at the time the work was done, which is a violation of this exemption. You may not hire an unlicensed person as your contractor. Your work must be done according to all local, state and federal laws and regulations which apply to asbestos abatement projects. It is your responsibility to make sure that people employed by you have licenses required by state law and by county or municipal licensing ordinances.

105.3.7 *Applicable Code for Manufactured Buildings.* Manufacturers should be permitted to complete all buildings designed and approved prior to the effective date of a new code edition, provided a clear signed contract is in place. The contract shall provide specific data mirroring that required by an application for permit, specifically, without limitation, date of execution, building owner or dealer, and anticipated date of completion. However, the construction activity must commence within 180 days of the contract's execution. The contract is subject to verification by the Department of Business and Professional Regulation.

105.3.8 A local government may not require a contract between a builder and an owner for the issuance of a building permit or as a requirement for the submission of a building permit application.

105.3.89 *Public right of way.* A permit shall not be given by the building official for the construction, alteration, or relocation of any building, structure, equipment or system impacting any street, alley or public lane, unless the applicant has received a right-of-way permit from the authority having jurisdiction over the right-of-way.

105.4 *Conditions of the permit.* The issuance or granting of a permit shall not be construed to be a permit for, or an approval of, any violation of any of the provisions of this code or of any other ordinance of the Town, code, or regulation. Permits presuming to give authority to violate or cancel the provisions of this code or of any other federal, state, or local law, or any other ordinances of the Town, code, or regulation shall not be valid. The issuance of a permit based on construction documents and other data shall not prevent the building official from requiring the correction of errors in the construction documents and other data. The building official is also authorized to prevent occupancy or use of a structure where in violation of this code or of any other federal, state, or local law, or any other ordinances of the Town, code, or regulation.

105.4.1 *Permit intent.* A permit issued shall be construed to be a license to proceed with the work and not as authority to violate, cancel, alter or set aside any of the provisions of the technical codes, nor shall issuance of a permit prevent the building official from thereafter requiring a correction of errors in plans, construction or violations of this code. Every permit issued shall become invalid (inactive or expired) unless the work authorized by such permit is commenced within 180 days after its issuance, or if the work authorized by such permit is suspended or abandoned for a period of 180 days after the time the work is commenced.

105.4.1.1 If work has commenced and the permit is revoked, becomes null and void or expires because of lack of progress or abandonment, a new permit, or revalidation of

the original permit, covering the proposed construction shall be obtained before proceeding with the work.

105.4.1.2 If a new permit, or revalidation (90) of the original permit, is not obtained within 180 days from the date the initial permit became invalid (inactive or expired) it shall be deemed null and void, the building official is authorized to require that any work which has been commenced or completed be removed from the building site. Alternately, a new permit may be issued on application, providing the work in place and required to complete the structure meets all applicable regulations in effect at the time the initial permit became null and void and any regulations which may have become effective between the date of expiration and the date of issuance of the new permit.

105.4.1.3 Work shall be considered to be in active progress when the permit has received an approved inspection within 180 days. This provision shall not be applicable in case of civil commotion or strike or when the building work is halted due directly to judicial injunction, order or similar process, or due to action by an environmental or archeological agency having jurisdiction. The building official is authorized to grant, in writing, one or more extensions of time, for periods not more than 90 days each. The extension shall be requested in writing and justifiable cause demonstrated, prior to expiration.

105.4.1.4 The fee for renewal, reissuance, and extension of a permit shall be set forth on the Town's fee schedule adopted by resolution of the Town Commission. There may be fees or requirements from other government agencies for permit extensions and renewals.

105.4.1.5 After the local enforcing agency issues a permit, the local enforcing agency may not make or require any substantive changes to the plans or specifications except changes required for compliance with the Florida Building Code, the Florida Fire Prevention Code, or the Life Safety Code, or local amendments thereto. If a local enforcing agency makes or requires substantive changes to the plans or specifications after a permit is issued, the local enforcing agency must identify the specific plan features that do not comply with the applicable codes, identify the specific code chapters and sections upon which the finding is based, and provide the information to the permitholder in writing.

105.5 *Expiration.* (Reserved FBC) Every permit issued shall become invalid (inactive or expired) unless the work on the site authorized by such permit is commenced within 180 days after its issuance, or if the work authorized on the site by such permit is suspended or abandoned for a period of 180 days after the time the work is commenced. The Building Official is authorized to grant, in writing, one or more extensions of time, for periods not more than 90 days each. The extension shall be requested in writing and shall include good cause for the justification for the extension. If an additional 180 days passes while the permit is invalid (inactive or expired) it shall be deemed null and void and a new permit shall be applied for meeting the current codes in effect.

105.5.1 Additional options for closing a permit. Pursuant to Section 553.79(15), Florida Statutes, a property owner, regardless of whether the property owner is the one listed on the application for the building permit, may close a building permit by complying with the following requirements:

1. The property owner may retain the original contractor listed on the permit or hire a different contractor appropriately licensed in this state to perform the work necessary to satisfy the conditions of the permit and to obtain any necessary inspection in order to close the permit. If a contractor other than the original contractor listed on the permit is hired by the property owner to close the permit, such contractor is not liable for any defects in the work performed by the original contractor and is only liable for the work that he or she performs.

2. The property owner may assume the role of an owner-builder, in accordance with Sections 489.103(7) and 489.503(6), Florida Statutes.

3. If a building permit is inactive or expired and its requirements have been substantially completed and no life safety issues exist, as determined by the local enforcement agency, the permit may be closed without having to obtain a new building permit, and the work required to close the permit may be done pursuant to the building code in effect at the time the local enforcement agency received the application for the permit, unless the contractor has sought and received approval from the local enforcement agency for an alternative material, design or method of construction.

4. A local enforcement agency may close a building permit 6 years after the issuance of the permit, even in the absence of a final inspection, if the local enforcement agency determines that no apparent safety hazard exists.

105.5.1.1 For purposes of this section, the term “close” means that the requirements of the permit have been satisfied.

105.5.1.2 For the purposes of this subsection, an open permit shall mean a permit that has not satisfied all requirements for completion as listed in Section 110.

105.5.2 Responsibility to close permits. Closing out or resolving open, inactive or expired permits shall be the responsibility of the permit applicant and the property owner. Failure to close out or resolve open permits may result in a referral of the matter to the Palm Beach County Construction Industry Licensing Board (CILB) or Local Construction Regulation Board (LCRB), as applicable, and the Town’s Code Enforcement Division.

105.6 *Denial or Revocation of permits.* Whenever a permit required under this section is denied or revoked because the plan, or the construction, erection, alteration, modification, repair, or demolition of a building, is found by the Town to be not in compliance with the Florida Building Code, the town shall identify the specific plan or project features that do not comply with the applicable codes, identify the specific code chapters and sections upon which the finding is based, and provide this information to the permit applicant. If the Town's Building Official or inspector finds that the plans are not in compliance with the Florida Building Code, he shall identify the specific plan features that do not comply with the applicable codes, identify the specific code chapters and sections upon which the finding is based, and provide this information to the town and permit applicant.

105.6.1 *Arm’s-length purchasers.* Pursuant to Section 553.79(16), Florida Statutes, a local enforcement agency may not deny issuance of a building permit to; issue a notice of violation to; or fine, penalize sanction or assess fees against an arm’s-length purchaser of a property for value solely because a building permit applied for by a previous owner of the property was not closed. The local enforcement agency shall maintain all rights and remedies against the property owner and contractor listed on the permit.

105.6.2 *Discipline.* Pursuant to Section 553.79(16), Florida Statutes, a local enforcement agency may not deny issuance of a building permit to a contractor solely because the contractor is listed on other building permits that were not closed. However, the local enforcement agency shall maintain all other rights and remedies against the contractor listed on the permit(s), including, but not limited to, potential referral to the appropriate licensing authority for potential discipline.

105.6.3 *Misrepresentation of application.* The Building Official may suspend or revoke a permit or approval, issued under the provisions of this Chapter 54, in case there has been any false statement or misrepresentation as to the material fact in the application or plans on which the permit or approval was based.

105.6.4 *Violation of code provisions.* The Building Official may require correction or revoke the permit upon determination by the Building Official that the construction, erection, alteration, repair, moving, demolition, installation, or replacement of the building, structure, electrical, gas, mechanical or plumbing systems for which the permit was issued is in violation of, or not in conformity with, the provisions of this code.

- 105.7 *Placement of permit.* The building permit or copy shall be kept on the site of the work until the completion of the project.
- 105.8 *Notice of commencement.* In accordance with Section 713.135, F.S., when any person applies for a building permit, the Town shall print on the face of each permit card in no less than 14-point, capitalized, boldfaced type: "WARNING TO OWNER: YOUR FAILURE TO RECORD A NOTICE OF COMMENCEMENT MAY RESULT IN YOUR PAYING TWICE FOR IMPROVEMENTS TO YOUR PROPERTY. IF YOU INTEND TO OBTAIN FINANCING, CONSULT WITH YOUR LENDER OR AN ATTORNEY BEFORE RECORDING YOUR NOTICE OF COMMENCEMENT."
- 105.9 *Asbestos.* The Town shall require each building permit for the demolition or renovation of an existing structure to contain an asbestos notification statement which indicates the owner's or operator's responsibility to comply with the provisions of Section 469.003, F.S., and to notify the Department of Environmental Protection of his or her intentions to remove asbestos, when applicable, in accordance with state and federal law. Refer to Section 105.3.6 "Asbestos Removal" above, for additional requirements.
- 105.10 *Certificate of protective treatment for prevention of termites.* A weather-resistant job-site posting board shall be provided to receive duplicate treatment certificates as each required protective treatment is completed, supplying one copy for the person the permit is issued to and another copy for the building permit files. The treatment certificate shall provide the product used, identity of the applicator, time and date of the treatment, site location, area treated, chemical used, percent concentration and number of gallons used, to establish a verifiable record of protective treatment. If the soil chemical barrier method for termite prevention is used, final exterior treatment shall be completed prior to final building approval. For a bait system, see Section 1816.1.7 of the Florida Building Code for contract document requirements.
- 105.11 *Notice of termite protection.* A permanent sign which identifies the termite treatment provider and need for re-inspection and treatment contract renewal shall be provided. The sign shall be posted near the water heater or electric panel.
- 105.12 *Work starting before permit issuance.* Upon written request and approval of the building official, the scope of work delineated in the building permit application and plan may be started prior to the final approval and issuance of the permit, provided any work completed is entirely at risk of the permit applicant and the work does not proceed past the first required inspection. This provision is only for the Florida Building Code; all other Agency approvals necessary for construction must be secured prior to this provision being applied.
- 105.13 *Phased permit approval.* After submittal of the appropriate construction documents, the building official is authorized to issue a permit for the construction of foundations or any other part of a building or structure before the construction documents for the whole building or structure have been submitted. The holder of such permit for the foundation or other parts of a building or structure shall proceed at the holder's own risk with the building operation and without assurance that a permit for the entire structure will be granted. Corrections may be required to meet the requirements of the technical codes. This provision is only for the Florida Building Code; all other Agency approvals necessary for construction must be secured prior to this provision being applied.
- 105.14 *Permit issued on basis of an affidavit.* The building official may accept a sworn affidavit from a registered architect or engineer stating that the plans submitted conform to the technical codes. For buildings and structures, the affidavit shall state that the plans conform to the laws as to egress, type of construction and general arrangement and, if accompanied by drawings, show the structural design and that the plans and design conform to the requirements of the technical codes as to strength, stresses, strains, loads and stability. Whenever a permit is issued in reliance upon an affidavit or whenever the work to be covered by a permit involves installation under conditions which, in the opinion of the building official, are hazardous or complex, the building official shall require that the architect or engineer who signed the affidavit or prepared the drawings or computations shall inspect such work. The building official may

without any examination or inspections except such affidavit, provided the architect or engineer who made such affidavit agrees to submit to the building official copies of inspection reports as inspections are performed. In addition, they shall certify conformity to the permit, and upon completion of the structure, electrical, gas, mechanical or plumbing systems make and file with the building official written affidavit that the work has been done in conformity to the reviewed plans and that the structure, electrical, gas, mechanical or plumbing system has been erected in accordance with the requirements of the technical codes. Where the building official relies upon such affidavit, the architect or engineer shall assume full responsibility for compliance with all provisions of the technical codes and other pertinent laws or ordinances. In the event such architect or engineer is not available, the owner shall employ in his stead a competent person or agency whose qualifications are reviewed by the building official. The building official shall ensure that any person conducting plans review is qualified as a plans examiner under Chapter 468, F.S., Part XII and that any person conducting inspections is qualified as a building inspector under Chapter 468, F.S. Part XII. Nothing aforesaid shall preclude plan review or inspections by the building official (See also Section 107.6 of this code).

Exception: Permit issued on basis of an affidavit shall not extend to the flood load and flood resistance requirements of the Florida Building Code.

105.15 *Opening protection.* When any activity requiring a building permit, not including roof covering replacement or repair work associated with the prevention of degradation of the residence, that is applied for on or after July 1, 2008, and for which the estimated cost is \$50,000 or more for a site built single family detached residential structures that is located in the wind borne debris region as defined in this Code and that has an insured value of \$750,000 or more, or, if the site built single family detached residential structures is uninsured or for which documentation of insured value is not presented, has a just valuation for the structure for purposes of ad valorem taxation of \$750,000 or more; opening protections as required within this Code or Florida Building Code, Residential for new construction shall be provided.

Exception: Single family residential structures permitted subject to the Florida Building Code are not required to comply with this section, unless constructed as a partially enclosed structure without opening protection.

105.16 *Inspection of existing residential building not impacted by construction.*

- (a) The town, local enforcing agency, and any local building code administrator, inspector, or other official or entity, may not require as a condition of issuance of a one- or two-family residential building permit the inspection of any portion of a building, structure, or real property that is not directly impacted by the construction, erection, alteration, modification, repair, or demolition of the building, structure, or real property for which the permit is sought.
- (b) This subsection does not apply to a building permit sought for:
 - 1. A substantial improvement as defined in Section 161.54, Florida Statutes or as defined in the Florida Building Code.
 - 2. A change of occupancy as defined in the Florida Building Code.
 - 3. A conversion from residential to nonresidential or mixed use pursuant to Section 553.507(2)(a), Florida Statutes or as defined in the Florida Building Code.
 - 4. A historic building as defined in the Florida Building Code.
- (c) This subsection does not prohibit the town, local enforcing agency, or any local building code administrator, inspector, or other official or entity, from:
 - 1 Citing any violation inadvertently observed in plain view during the ordinary course of an inspection conducted in accordance with the prohibition in paragraph (a).

- 2 Inspecting any other building, structure, or real property that is directly impacted by the construction, erection, alteration, modification, repair, or demolition of the building, structure, or real property for which a permit has been sought in accordance with subsection (a), above.
- 3 Inspecting any portion of a building, structure, or real property for which the owner or other person having control of the building, structure, or real property has voluntarily consented to an inspection of that portion of the building, structure, or real property in accordance with subsection (a), above.
- 4 Inspecting any portion of a building, structure, or real property pursuant to an inspection warrant issued in accordance with Sections 933.20 through 933.30, Florida Statutes.

105.17 *Streamlined low-voltage alarm system installation permitting.*

- (1) As used in this subsection, the term:
 - (a) "Contractor" means a person who is qualified to engage in the business of electrical or alarm system contracting pursuant to a certificate or registration issued by the department under part II of chapter 489, Florida Statutes.
 - (b) "Low-voltage alarm system project" means a project related to the installation, maintenance, inspection, replacement, or service of a new or existing alarm system, as defined in Section 489.505, Florida Statutes, operating at low voltage, as defined in the National Electrical Code Standard 70, and ancillary components or equipment attached to such a system, including, but not limited to, home-automation equipment, thermostats, and video cameras.
 - (c) "Low-voltage electric fence" means an alarm system, as defined in s. 489.505, that consists of a fence structure and an energizer powered by a commercial storage battery not exceeding 12 volts which produces an electric charge upon contact with the fence structure.
 - (d) "Wireless alarm system" means a burglar alarm system or smoke detector that is not hardwired.
- (2) Notwithstanding any provision of this Chapter 54, this subsection shall apply to low-voltage alarm system projects for which a permit is required by a local enforcement agency. However, a permit is not required to install, maintain, inspect, replace, or service a wireless alarm system, including any ancillary components or equipment attached to the system.
- (3) 3. A low-voltage electric fence must meet all of the following requirements to be permitted as a low-voltage alarm system project and no further permit shall be required for the low-voltage alarm system project other than as provided in this section:
 - (a) The electric charge produced by the fence upon contact must not exceed energizer characteristics set forth in paragraph 22.108 and depicted in Figure 102 of International Electrotechnical Commission Standard No. 60335-2-76, Current Edition.
 - (b) A nonelectric fence or wall must completely enclose the low-voltage electric fence. The low-voltage electric fence may be up to 2 feet higher than the perimeter nonelectric fence or wall.
 - (c) The low-voltage electric fence must be identified using warning signs attached to the fence at intervals of not more than 60 feet.
 - (d) The low-voltage electric fence shall not be installed in an area zoned exclusively for single-family or multi-family residential use.
 - (e) The low-voltage electric fence shall not enclose the portions of a property which are used for residential purposes.

- (4) This subsection does not apply to the installation or replacement of a fire alarm, or access control system affecting required means of egress as required by Florida Building Code Chapter 10, if a plan review is required.
- (5) The town shall make uniform basic permit labels available for purchase by a contractor to be used for the installation or replacement of a new or existing alarm system at a cost as indicated in Section 553.793, Florida Statutes. The local enforcement agency may not require the payment of any additional fees, charges, or expenses associated with the installation or replacement of a new or existing alarm.
 - (a) The town may not require a contractor, as a condition of purchasing a label, to submit information other than identification information of the licensee and proof of registration or certification as a contractor.
 - (b) A label is valid for 1 year after the date of purchase and may only be used within the issuance of the label. A contractor may purchase labels in bulk for one or more unspecified current or future projects.
- (6) A contractor shall post an unused uniform basic permit label in a conspicuous place on the premises of the low-voltage alarm system project site before commencing work on a project.
- (7) A contractor is not required to notify the town before commencing work on a low-voltage alarm system project. However, a contractor shall submit a Uniform Notice of a Low-Voltage Alarm System Project as provided under subsection (7) to the town within 14 days after completing a project. The town may take disciplinary action against a contractor who fails to timely submit a Uniform Notice of a Low-Voltage Alarm System for a project.
- (8) The Uniform Notice of a Low-Voltage Alarm System may be submitted electronically or by facsimile if all submissions are signed by the owner, tenant, contractor, or authorized representative of such persons. The Uniform Notice of a Low-Voltage Alarm System Project shall be in the format prescribed by the local enforcement agency and must comply with the requirements of Section 553.793(7) and (8), Florida Statutes.
- (9) A project with a low-voltage alarm system may be inspected by the town to ensure compliance with applicable codes and standards. If a project with a low-voltage alarm system fails an inspection, the contractor shall take such corrective actions as may be necessary to pass inspection.
- (10) A municipality, county, district, or other entity of local government may not adopt or maintain in effect any ordinance or rule regarding a low-voltage alarm system project that is inconsistent with this section.
- (11) A uniform basic permit label shall not be required for the subsequent maintenance, inspection, or service of an alarm system that was permitted in accordance with this subsection.

The provisions of this act are not intended to impose new or additional licensure requirements on persons licensed in accordance with the applicable provisions of chapter 489, Florida Statutes.

Section 106. *Floor and Roof Design Loads.*

- 106.1 *Live loads posted.* Where the live loads for which each floor or portion thereof of a commercial or industrial building is or has been designed to exceed 50 psf (2.40 kN/m²), such design live loads shall be conspicuously posted by the owner in that part of each story in which they apply, using durable signs. It shall be unlawful to remove or deface such notices. For residential construction where roof trusses have been designed for 30 psf for light attic storage, a durable sign shall be posted in the attic area at final building inspection.
- 106.2 *Issuance of certificate of occupancy.* A certificate of occupancy required by Section 111 shall not be issued until the floor load signs, required by Section 106.1, have been installed.

106.3 *Restrictions on loading.* It shall be unlawful to place, or cause or permit to be placed, on any floor or roof of a building, structure or portion thereof, a load greater than is permitted by this code.

Section 107. *Submittal Documents.*

107.1 *General.* Submittal documents consisting of construction documents, statement of special inspections, geotechnical report and other data shall be submitted in two or more sets in electronic format in accordance with Florida Statute 553.79 unless otherwise approved by the building official with each permit application. The construction documents shall be prepared by a registered design professional where required by Chapter 471, F.S. & 61G-15 F.A.C. or Chapter 481, F.S. & 61G-1 F.A.C. Where special conditions exist, the building official is authorized to require additional construction documents to be prepared by a registered design professional. Electronic media documents shall be submitted when required by the building official, and may require only one set of submittals.

Exception: The building official is authorized to waive the submission of construction documents and other data not required to be prepared by a registered design professional if it is found that the nature of the work applied for is such that review of construction documents is not necessary to obtain compliance with this code.

If the design professional is an architect, interior designer, or engineer legally registered under the laws of the State of Florida regulating the practice of architecture or interior design as provided for in Chapter 481, Florida Statutes, Part I, or landscape architecture as provided for in Chapter 481, Florida Statutes, Part II, or engineering as provided for in Chapter 471, Florida Statutes, then he or she shall affix his or her official seal to said drawings, specifications and accompanying data, as required by Florida Statute.

107.2 *Construction documents.* Construction documents shall be in accordance with Sections 107.2.1 through 107.2.5.

107.2.1 *Information on construction documents.* Construction documents shall be dimensioned and drawn upon suitable material. Electronic media documents shall be submitted when approved by the building official. Construction documents shall be of sufficient clarity to indicate the location, nature and extent of the work proposed and show in detail that it will conform to the provisions of this code and relevant laws, ordinances, rules and regulations, as determined by the building official. Such drawings and specifications shall contain information, in the form of notes or otherwise, as to the quality of materials, where quality is essential to conformity with the technical codes. Such information shall be specific, and the technical codes shall not be cited as a whole or in part, nor shall the term "legal" or its equivalent be used as a substitute for specific information. All information, drawings, specifications and accompanying data shall bear the name and signature of the person responsible for the design. (See also Section 107.1).

107.2.1.1 For roof assemblies required by the code, the construction documents shall illustrate, describe and delineate the type of roofing system, materials, fastening requirements, flashing requirements and wind resistance rating that are required to be installed. Product evaluation and installation shall indicate compliance with the wind criteria required for the specific site or a statement by an architect or engineer for the specific site must be submitted with the construction documents.

107.2.1.2 *Additional data.* The Building Official may require details, computations, stress diagrams, and other data necessary to describe the construction or installation and the basis of calculations. All drawings, specifications and accompanying data required by the Building Official to be prepared by an architect or engineer shall be affixed with their official seal, signature and date in accordance with state law.

107.2.1.3 *Quality of building plans.* Building plans shall be drawn to a minimum 1/8 inch scale upon substantial paper, cloth or other acceptable medium. The building official

may establish through divisional policy, other standards for plans and specifications, in order to provide conformity to its record retention program. This policy may include such things as minimum size, shape, contrast, clarity, or other items related to records management. Electronic media must be compatible with the archive requirements of Florida Statutes.

107.2.2 *Fire protection system shop drawings.* Shop drawings for fire protection systems shall be submitted to indicate conformance to this Chapter 54 and the construction documents and shall be approved prior to the start of system installation. Shop drawings shall contain all information as required by the referenced installation standards in Chapter 9.

107.2.3 *Means of egress.* The construction documents shall show in sufficient detail the location, construction, size and character of all portions of the means of egress in compliance with the provisions of this code. In other than occupancies in Groups R-2, R-3, and I-1, the construction documents shall designate the number of occupants to be accommodated on every floor, and in all rooms and spaces.

107.2.4 *Exterior wall envelope.* Construction documents for all buildings shall describe the exterior wall envelope in sufficient detail to determine compliance with this code. The construction documents shall provide details of the exterior wall envelope as required, including flashing, intersections with dissimilar materials, corners, end details, control joints, intersections at roof, eaves or parapets, means of drainage, water-resistive membrane and details around openings.

The construction documents shall include manufacturer's installation instructions that provide supporting documentation that the proposed penetration and opening details described in the construction documents maintain the weather resistance of the exterior wall envelope. The supporting documentation shall fully describe the exterior wall system which was tested, where applicable, as well as the test procedure used.

107.2.5 *Exterior balcony and elevated walking surfaces.* Where balcony or other elevated walking surfaces are exposed to water from direct or blowing rain, snow or irrigation, and the structural framing is protected by an impervious moisture barrier the construction documents shall include details for all element of the impervious moisture barrier system. The construction documents shall include manufacturer's installation instructions.

107.2.6 *Site plan.* The construction documents submitted with the application for permit shall be accompanied by a site plan showing to scale the size and location of new construction and existing structures on the site, distances from lot lines, the established street grades and the proposed finished grades and, as applicable, flood hazard areas, floodways, and design flood elevations; and it shall be drawn in accordance with an accurate boundary line survey. In the case of demolition, the site plan shall show construction to be demolished and the location and size of existing structures and construction that are to remain on the site or plot. The site plan shall include accessible parking and accessible routes as required by the FBC Accessibility when applicable. The building official is authorized to waive or modify the requirement for a site plan when the application for permit is for alteration or repair or when otherwise warranted.

107.2.6.1 *Design flood elevations.* Where design flood elevations are not specified, they shall be established in accordance with Section 1612.3.1 of this code. Design flood elevations shall be uniformly specified utilizing the currently effective NAVD 88.

107.2.6.2 For the purpose of inspection and record retention, site plans for a building may be maintained in the form of an electronic copy at the worksite. These plans must be open to inspection by the building official or a duly authorized representative, as required by the Florida Building Code.

107.2.7 *Structural information.* The construction documents shall provide the information specified in Section 1603 of this code and include shoring details, where applicable, for new construction and alterations. Where construction includes excavation, shoring details

shall demonstrate protection of the angle of repose for foundation systems of existing adjacent structures.

107.3 *Examination of documents.* The building official shall examine or cause to be examined the accompanying submittal documents and shall ascertain by such examinations whether the construction indicated and described is in accordance with the requirements of this code and other pertinent laws or ordinances.

Exceptions:

1. Building plans approved pursuant to Section 553.77(3), F.S., and state-approved manufactured buildings are exempt from local codes enforcing agency plan reviews except for provisions of the code relating to erection, assembly or construction at the site. Erection, assembly (including utility crossover connections) and construction at the site are subject to local permitting and inspections. Photocopies of plans approved according to 61-41.009, FAC., shall be sufficient for local permit application documents of record for the modular building portion of the permitted project.
2. Industrial construction on sites where design, construction and fire safety are supervised by appropriately licensed design and inspection professionals and which contain adequate in-house fire departments and rescue squads is exempt, subject to approval by the building official, from review of plans and inspections, providing the appropriate licensed design and inspection professionals certify that applicable codes and standards have been met and supply appropriate approved drawings to local building and fire-safety inspectors.

107.3.1 *Approval of construction documents.* When the building official issues a permit, the construction documents shall be noted, in writing or by stamp, as "Reviewed for Code Compliance." One set of construction documents so reviewed shall be retained by the building official. The other set shall be returned to the applicant, shall be kept at the site of work and shall be open to inspection by the building official or a duly authorized representative.

107.3.2 *Previous approvals.* This code shall not require changes in the construction documents, construction or designated occupancy of a structure for which a lawful permit has been heretofore issued or otherwise lawfully authorized, and the construction of which has been pursued in good faith within 180 days after the effective date of this code and has not been abandoned and considered null and void. (See Section 105.5 of the code)

107.3.3 *Phased approval.* (See also Section 105.13 of this code.) The building official is authorized to issue a permit for the construction of foundations or any other part of a building or structure before the construction documents for the whole building or structure have been submitted, provided that adequate information and detailed statements have been filed complying with pertinent requirements of this code. The holder of such permit for the foundation or other parts of a building or structure shall proceed at the holder's own risk with the building operation and without assurance that a permit for the entire structure will be granted.

107.3.4 *Design professional in responsible charge.* (Reserved FBC) When it is required that documents be prepared by a registered design professional, the building official shall be authorized to require the owner to engage and designate on the building permit application a registered design professional who shall act as the registered design professional in responsible charge. If the circumstances require, the owner shall designate a substitute registered design professional in responsible charge who shall perform the duties required of the original registered design professional in responsible charge. The building official shall be notified in writing by the owner if the registered design professional in responsible charge is changed or is unable to continue to perform the duties.

The registered design professional in responsible charge shall be responsible for reviewing and coordinating submittal documents prepared by others, including phased and deferred submittal items, for compatibility with the design of the building. Those products which are

regulated by FAC Rule 61G20 shall be reviewed and approved in writing by the designer of record prior to submittal for jurisdictional approval.

107.3.4.0.1 Other than Single-Family Residences. The plans and specifications for new construction, alterations, repairs, improvements, replacements, or additions costing fifteen thousand dollars (\$15,000.00) or more, shall be prepared by, and each sheet shall bear the signature and seal of an Architect or Engineer. If plans are in an electronic format each pdf sheet shall be digitally signed or if in a multi-page binder discipline specific package only the cover page of the pdf with an index needs to be digitally signed.

Exception: Roofing as set forth in FBC, Chapter 15.

107.3.4.0.2 Single-Family Residences. The plans and specifications for new construction, alterations, repairs, improvements, replacements, or additions costing thirty thousand dollars (\$30,000.00) or more, shall be prepared by an Architect or Engineer. Each sheet shall be signed and sealed by the Architect or Engineer. If plans are in an electronic format each pdf sheet shall be digitally signed or if in a multi-page binder discipline specific package only the cover page of the pdf with an index needs to be digitally signed.

107.3.4.0.3 Plans and specifications for work that is preponderantly of an architectural nature shall be prepared by a Registered Architect, and work that involves extensive computation based on structural stresses shall, in addition, be prepared by a Professional Engineer.

107.3.4.0.4 Plans and specifications for work that is preponderantly of a mechanical or electrical nature shall, at the discretion of the Building Official, be prepared by a Professional Engineer.

107.3.4.0.5 Compliance with the specific minimum requirements of this Code shall not be deemed sufficient to assure that a building or structure complies with all of the requirements of this Code. It is the responsibility of the architect or engineer of record for the building or structure to determine through rational analysis what design requirements are necessary to comply with this Code.

107.3.4.0.6 For any work involving structural design, the Building Official may require that plans, calculations, and specifications be prepared by a Professional Engineer, regardless of the cost of such work.

107.3.4.0.7 Electrical plans and specifications for new construction shall be prepared by a Professional Engineer competent in the appropriate field of expertise for all buildings or structures having electrical services or systems as follows:

a. Residential systems requiring an aggregate electrical service capacity of more than 600 amperes or more than 240 volts.

b. Commercial or industrial systems requiring more than 800 amperes or more than 240 volts.

c. An electrical system having a cost value greater than one hundred twenty-five thousand dollars (\$125,000.00).

d. An electrical system for an assembly area having an area greater than five thousand (5,000) square feet.

e. A fire alarm or security alarm system that costs more than five thousand dollars (\$5,000.00)

107.3.4.0.8 Signatures and Seals. All plans, specifications, and other construction documents required to be prepared by an Architect or Engineer, shall be signed, dated, and sealed, either original signed wet seal, embossed seal, or digital seal, according to the requirements of Chapters 471 and 481 of the Florida Statutes.

107.3.4.1 *Deferred submittals.* For the purposes of this section, deferred submittals are defined as those portions of the design that are not submitted at the time of the application and that are to be submitted to the building official within a specified period.

Deferral of any submittal items shall have the prior approval of the building official. The registered design professional in responsible charge shall list the deferred submittals on the construction documents for review by the building official.

Documents for deferred submittal items shall be submitted to the registered design professional in responsible charge who shall review them and forward them to the building official with a notation indicating that the deferred submittal documents have been reviewed and found to be in general conformance to the design of the building. The deferred submittal items shall not be installed until the deferred submittal documents have been approved by the building official.

107.3.4.2 Certifications by contractors authorized under the provisions of Section 489.115(4)(b) F.S., shall be considered equivalent to sealed plans and specifications by a person licensed under Chapter 471, F.S., or Chapter 481 F.S., by local enforcement agencies for plans review for permitting purposes relating to compliance with the wind-resistance provisions of the code or alternate methodologies approved by the Florida Building Commission for one and two-family dwellings. The town may rely upon such certification by contractors that the plans and specifications submitted conform to the requirements of the code for wind resistance. Upon good cause shown, the town may accept or reject plans sealed by persons licensed under Chapters 471,481 or 489, Florida Statutes.

107.3.5 *Minimum plan review criteria for buildings.* The examination of the documents by the building official shall include the following minimum criteria and documents: a floor plan; site plan; foundation plan; floor/roof framing plan or truss layout; all fenestration and building envelope penetrations; flashing; and rough opening dimensions; and all exterior elevations:

107.3.5.1 *Commercial Buildings:*

107.3.5.1.1 *Building*

1. Site requirements:

Parking

Fire access

Vehicle loading

Driving/turning radius

Fire hydrant/water supply/post indicator valve (PIV)

Set back/separation (assumed property lines)

Location of specific tanks, water lines and sewer lines

Flood hazard areas, flood zones, and design flood elevations.

2. Occupancy group and special occupancy requirements shall be determined (with cross check with the energy code submittal).

3. Minimum type of construction shall be determined (see Table 503).

4. Fire-resistant construction requirements shall include the following components:

Fire-resistant separations

Fire-resistant protection for type of construction

Protection of openings and penetrations of rated walls

Fire blocking and draft-stopping and calculated fire resistance

5. Fire suppression systems shall include:

Early warning smoke evacuation systems

Schematic fire sprinklers

Standpipes

Pre-engineered systems

Riser diagram

6. Life safety systems shall be determined and shall include the following requirements:

Occupant load and egress capacities

Early warning

Smoke control

Stair pressurization

Systems schematic

Safeguards during construction, as applicable

7. Occupancy load/egress requirements shall include:

Occupancy load

Gross

Net

- Means of egress
- Exit access
- Exit
- Exit discharge
- Stairs construction/geometry and protection
- Doors
- Emergency lighting and exit signs
- Specific occupancy requirements
- Construction requirements
- Horizontal exits/exit passageways

8. Structural requirements shall include:

- Soil conditions/analysis
- Termite protection
- Design loads
- Wind requirements
- Building envelope (including Section 107.2.4 of this code)
- Structural calculations (if requested)
- Foundation
- Flood requirements in accordance with Section 1612 of this code, including lowest floor elevations, enclosures, flood damage-resistant materials
- Wall systems
- Floor systems
- Roof systems
- Threshold inspection plan
- Stair systems

9. Materials shall be reviewed and shall at a minimum include the following:

- Wood
- Steel
- Aluminum
- Concrete
- Plastic

Glass

Masonry

Gypsum board and plaster

Insulating (mechanical)

Roofing

Deck coatings

Insulation

Building envelope portions of the Energy Code (including calculation and mandatory requirements)

10. Accessibility requirements shall include the following:

Site requirements

Accessible route

Vertical accessibility

Toilet and bathing facilities

Drinking fountains

Equipment

Special occupancy requirements

Fair housing requirements

11. Interior requirements shall include the following:

Interior finishes (flame spread/smoke development)

Light and ventilation (including corresponding portion of the energy code)

Sanitation

12. Special systems:

Elevators

Escalators

Lifts

13. Energy Code submittal

14. Swimming Pools:

Barrier Requirements

Spas

Wading pools

15. Location and installation details. The specific location and installation details of each fire door, fire damper, ceiling damper and smoke damper shall be shown and properly identified on the building plans by the designer

107.3.5.1.2 *Electrical*

1. Electrical:
 - Wiring
 - Services
 - Feeders and branch circuits
 - Overcurrent protection
 - Grounding
 - Wiring methods and materials
 - GFCIs
 - Electrical portions of the Energy Code (including calculation and mandatory requirements)
2. Equipment.
3. Special occupancies.
4. Emergency systems.
5. Communication systems.
6. Low voltage.
7. Load calculations.
8. Design flood elevation.

107.3.5.1.3 *Plumbing*

1. Minimum plumbing facilities.
2. Fixture requirements.
3. Water supply piping.
4. Sanitary drainage.
5. Water heaters.
6. Vents.
7. Roof drainage.
8. Back flow prevention.
9. Irrigation.
10. Location of water supply line.
11. Grease traps.
12. Environmental requirements.

- 13. Plumbing riser.
- 14. Design flood elevation.
- 15. Water/plumbing portions of the Energy Code (including calculation and mandatory requirements)

107.3.5.1.4 *Mechanical*

- 1. Mechanical portions of the Energy Calculations
- 2. Exhaust systems:
 - Clothes dryer exhaust
 - Kitchen equipment exhaust
 - Specialty exhaust systems
- 3. Equipment.
- 4. Equipment location.
- 5. Make-up air.
- 6. Roof-mounted equipment.
- 7. Duct systems.
- 8. Ventilation.
- 9. Combustion air.
- 10. Chimneys, fireplaces and vents.
- 11. Appliances.
- 12. Boilers.
- 13. Refrigeration.
- 14. Bathroom ventilation.
- 15. Laboratory.
- 16. Design flood elevation.

17. Smoke and/or Fire Dampers

107.3.5.1.5 *Gas*

- 1. Gas piping.
- 2. Venting.
- 3. Combustion air.
- 4. Chimneys and vents.
- 5. Appliances.
- 6. Type of gas.
- 7. Fireplaces.
- 8. LP tank location.
- 9. Riser diagram/shutoffs.
- 10. Design flood elevation.

- 11. Gas portions of the Energy Code (including calculation and mandatory requirements)
- 107.3.5.2 *Demolition*
 - 1. Asbestos removal.
- 107.3.5.3 *Residential (One and Two-Family)*
 - 1. Site requirements.
 - Set back/separation (assumed property lines)
 - Location of septic tanks
 - 2. Fire-resistant construction (if required).
 - 3. Fire protection systems, when required
 - 4. Smoke detector locations.
 - 5. Egress.
 - Egress window size and location stairs construction requirements
 - 6. Structural requirements shall include:
 - Wall section from foundation through roof, including assembly and materials, connector tables, wind requirements.
 - Termite protection
 - Design Loads
 - Wind requirements
 - Building envelope (including Section 107.2.4 of this code)
 - Structural calculations (if requested)
 - Foundation
 - Wall systems
 - Floor systems
 - Roof systems
 - 7. Accessibility requirements: show/identify accessible bath.
 - 8. Impact resistant coverings or systems.
 - 9. Required Florida Product Approvals.
 - 10. Flood hazard areas, flood zones, design flood elevations, lowest floor elevations, enclosures, equipment, and flood damage-resistant materials.
 - 11. Residential Energy Code submittal (including calculation and mandatory requirements)
 - 12. Electrical:
 - Electric service riser with wire sizes, conduit detail and grounding detail.
 - Complete load calculations, Panel schedules

- 13. Mechanical:
 - Equipment and location, Duct systems
- 14. Plumbing:
 - Plumbing riser
- 15. Gas:
 - Gas piping
 - Venting
 - Combustion air
 - Chimneys and vents
 - Appliances
 - Type of gas
 - Fireplaces
 - LP tank location
 - Riser diagram/shutoffs
- 107.3.5.4 *Swimming Pools*
 - 1. Barrier requirements.
 - 2. Spas.
 - 3. Wading pools.
- 107.3.5.5 *Manufactured buildings/housing.*
 - 1. Site requirements
 - Setback/separation (assumed property lines)
 - Location of septic tanks (if applicable)
 - 2. Structural
 - Wind zone
 - Anchoring
 - Blocking
 - 3. Plumbing
 - List potable water source and meter size (if applicable)
 - 4. Mechanical
 - Exhaust systems
 - Clothes dryer exhaust
 - Kitchen equipment exhaust
 - 5. Electrical exterior disconnect location
- 107.3.5.6 *Exemptions.* Plans examination by the building official shall not be required for the following work:

1. Replacing existing equipment such as mechanical units, water heaters, etc.;
2. Reroofs (as determined by the building official);
3. Minor electrical, plumbing and mechanical repairs;
4. Annual maintenance permits;
5. Prototype plans:
Except for local site adaption, siding, foundations and/or modifications.
Except for structures that require waiver; and
6. Manufactured buildings plan except for foundations and modifications of buildings on site and as listed above in manufactured buildings/housing.

107.4 *Amended construction documents.* Work shall be installed in accordance with the approved construction documents, and any changes made during construction that are not in compliance with the approved construction documents shall be resubmitted for review as an amended set of construction documents.

107.5 *Retention of construction documents.* One set of approved construction documents shall be retained by the building official as required by Florida Statutes.

107.6 *Affidavits.* The building official may accept a sworn affidavit from a registered architect or engineer stating that the plans submitted conform to the technical codes. For buildings and structures, the affidavit shall state that the plans conform to the laws as to egress, type of construction and general arrangement and, if accompanied by drawings, show the structural design and that the plans and design conform to the requirements of the technical codes as to strength, stresses, strains, loads and stability. The building official may without any examination or inspection accept such affidavit, provided the architect or engineer who made such affidavit agrees to submit to the building official copies of inspection reports as inspections are performed and upon completion of the structure, electrical, gas, mechanical or plumbing systems a certification that the structure, electrical, gas, mechanical or plumbing system has been erected in accordance with the requirements of the technical codes. Where the building official relies upon such affidavit, the architect or engineer shall assume full responsibility for compliance with all provisions of the technical codes and other pertinent laws or ordinances. The building official shall ensure that any person conducting plans review is qualified as a plans examiner under Chapter 468, F.S., Part XII and that any person conducting inspections is qualified as a building inspector under Chapter 468, F.S. Part XII (See also Section 105.14 of this code).

107.6.1 *Building permits issued on the basis of an affidavit in special flood hazard areas..* Pursuant to the requirements of federal regulation for participation in the National Flood Insurance Program (44 C.F.R. Parts 59 and 60), the authority granted to the Building Official to issue permits, to rely on inspections, and to accept plans and construction documents on the basis of affidavits and plans submitted pursuant to Sections 105.14 and 107.6, shall not extend to the flood load and flood resistance construction requirements of the Florida Building Code.

107.7 If the local building code administrator, plans examiner or inspector finds that the plans are not in compliance with the Florida Building Code, the local building code administrator or inspector shall identify the specific plan features that do not comply with the applicable codes, identify the specific code chapters and sections upon which the finding is based, and provide this information to the permit applicant.

If the building code administrator, plans examiner, or inspector requests another local enforcing agency employee or a person contracted by the local enforcing agency to review the plans and that employee or person identifies specific plan features that do not comply with the applicable codes, the building code administrator, plans examiner, or inspector must provide this

information to the local enforcing agency. The local enforcing agency shall provide this information to the permit applicant.

Section 108. *Temporary Structures and Uses.*

108.1 *General.* The building official is authorized to issue a permit for temporary structures and temporary uses. Such permits shall be limited as to time of service, but shall not be permitted for more than 6 months. The building official is authorized to grant extensions for demonstrated cause.

108.2 *Conformance.* Temporary structures and uses shall conform to the structural strength, fire safety, means of egress, accessibility, light, ventilation and sanitary requirements of this code as necessary to ensure public health, safety and general welfare (Refer to Section 3103 FBC-Building).

108.3 *Temporary power.* The building official is authorized to give permission to temporarily supply and use power in part of an electric installation before such installation has been fully completed and the final certificate of completion has been issued. The part covered by the temporary certificate shall comply with the requirements specified for temporary lighting, heat or power in NFPA 70 (National Electrical Code [NEC]).

108.4 *Termination of approval.* The building official is authorized to terminate such permit for a temporary structure or use and to order the temporary structure or use to be discontinued.

Section 109. *Fees.*

109.1 *Payment of Fees.* A permit application shall not be valid until the fees prescribed by the town has been paid, nor shall an amendment to a permit be released until the additional fee, if any, has been paid.

109.2 *Schedule of permit fees.* On buildings, structures, electrical, gas, mechanical and plumbing systems or alterations requiring a permit, a fee for each permit shall be paid as required, as set forth on the Town's fee schedule adopted by resolution of the Town Commission.

109.2.1 Types of Fees Enumerated. Fees may be charged for but not limited to the following:

1. Permits;
2. Plans examination;
3. Certificates of competency (including fees for applications, examinations, renewal, late renewal, and reciprocity);
4. Re-inspections;
5. Administrative fees (including fees for investigative and legal costs incurred in the context of certain disciplinary cases heard by the board);
6. Variance requests;
7. Administrative appeals;
8. Violations; and
9. Other fees as established by local resolution or ordinance.

109.3 *Building permit valuations.* If, in the opinion of the building official, the claimed valuation of building, alteration, structure, electrical, gas, mechanical or plumbing systems appears to be underestimated on the application, the permit shall be denied, unless the applicant can show detailed, quantity estimates, and/or bona fide signed contracts (excluding land value) to meet

the approval of the building official. For permitting purposes, valuation of buildings and systems shall be total replacement value to include structural, electric, plumbing, mechanical, interior finish, relative site work, architectural and design fees, marketing costs, overhead and profit; excluding only land value. Valuation references may include the latest published data of national construction cost analysis services (Marshall-Swift, Means, etc.). Final building permit valuation shall be set by the building official.

- 109.4 *Work commencing before permit issuance.* Any person who commences any work on a building, structure, electrical, gas, mechanical or plumbing system before obtaining the building official's approval or the necessary permits shall be subject to a penalty fee in addition to the required permit fees, as set in approved fee schedule set forth on the Town's fee schedule adopted by resolution of the Town Commission. This provision shall not apply to emergency work when delay would clearly have placed life or property in imminent danger. But in all such cases, there should be immediate notification to the Building Official and the required permit(s) must be applied for within three business (3) business days and any unreasonable delay in obtaining those permit(s) shall result in the charge of a penalty fee. The payment of a penalty fee shall not preclude or be deemed a substitute for prosecution for commencing work without first obtaining a permit. The Building Official may grant extensions of time or adjust penalties when justification cause has been demonstrated in writing.
- 109.5 *Related fees.* The payment of the fee for the construction, alteration, removal or demolition for work done in connection to or concurrently with the work authorized by a building permit shall not relieve the applicant or holder of the permit from the payment of other fees that are prescribed by law.
- 109.6 *Refunds.* The building official is authorized to establish a refund policy.

Section 110. *Inspections.*

- 110.1 *General.* Construction or work for which a permit is required shall be subject to inspection by the building official and such construction or work shall remain accessible and exposed for inspection purposes until approved.

Approval as a result of an inspection shall not be construed to be an approval of a violation of the provisions of this code or of other federal, state, or ordinances of the Town, code, or regulation. Inspections presuming to give authority to violate or cancel the provisions of this code or of other federal, state, or ordinances of the Town, code, or regulation shall not be valid. It shall be the duty of the permit applicant to cause the work to remain accessible and exposed for inspection purposes. The Building Official shall be permitted to require a boundary line survey prepared by a qualified surveyor whenever the boundary lines cannot be readily determined in the field. Neither the building official nor the Town shall be liable for expense entailed in the removal or replacement of any material required to allow inspection.

- 110.1.1 *Manufacturers and fabricators.* When deemed necessary by the building official, he/she shall make, or cause to be made, an inspection of materials or assemblies at the point of manufacture or fabrication. A record shall be made of every such examination and inspection and of all violations of the technical codes.

- 110.1.2 *Other inspections services.* The Building Official may make, or cause to be made by others, the inspections required by Section 110 of this code. He/she may accept reports of inspectors of recognized inspection services, provided that after investigation he/she is satisfied as to their qualifications and reliability. A certificate called for by any provision of the technical codes shall not be based on such reports unless the same are certified by the building code inspector or the architect or engineer performing building code inspections in writing and certified by a responsible officer of such service in a manner specified by the building official. The building official shall ensure that all persons making such inspections shall be certified in accordance to Chapter 468 Florida Statutes.-

The Building Official may require the owner to employ an inspection service in the following instances:

1. For buildings or additions of Type I construction;
2. For all major structural alterations;
3. Where the concrete design is based on compressive strength (f 'c) in excess of 3000 pounds per square inch;
4. For pile driving;
5. For buildings with area greater than 20,000 square foot;
6. For buildings more than 2 stories in height; or
7. For buildings and structures of unusual design or methods of construction.

Such inspectors shall be adequately present at times work is underway on the structural elements of the building. Such inspectors shall be a registered architect, or engineer. An employee of the architect or engineer licensed under Chapter 468, Part XII, Florida Statutes may perform the inspections, under the direction of and with final certification from the architect or engineer. Such inspectors shall submit weekly progress reports including the daily inspections to the building official, and including a code compliance opinion of the Resident Inspector.

At the completion of the construction work or project, such inspectors shall submit a certificate of compliance to the building official, stating that the work was done in compliance with this code and in accordance with the permitted drawing. Final inspection shall be made by the building official before a Certificate of Occupancy or Certificate of Completion is issued; and confirmation inspections may be made at any time to monitor activities and resident inspectors.

110.1.3 *Affidavit for inspection.* With specific prior approval of, and in a format acceptable to the building official, an affidavit for certification of inspection may be accepted from the permit qualifier; when accompanied by extensive photographic evidence of sufficient detail to demonstrate code compliance. The photographic evidence shall be comprehensive in the display of the installation and/or construction and job location identifiers. The affidavit and accompanying photographs shall be provided to the inspector onsite, at the next scheduled inspection. If the photographs:

1. are found to be insufficient by the building official to demonstrate compliance with this code and/or the permitted document, or clearly display location identifiers, or are missing, the inspector shall require the contractor to obtain the services of a Registered Florida Professional Engineer to inspect and certify the installation and/or construction.

110.1.3.1 Exception; Affidavits for inspection may not be utilized for inspection of specific construction requirements contained in 44CFR Sections 59 and 60 and a local Floodplain Management Ordinance for construction located in Special Flood Hazard areas.

110.2 *Preliminary inspection.* Subject to the limitations of Chapter 553.79(20), F.S., before issuing a permit, the building official is authorized to examine or cause to be examined buildings, structures and sites for which an application has been filed.

110.2.1 *Existing building inspections.* Before issuing a permit, the building official may examine or cause to be examined any building, electrical, gas, mechanical, or plumbing systems for which an application has been received for a permit to enlarge, alter, repair, move, demolish, install, or change the occupancy. He/she may inspect the buildings, structures, electrical, gas, mechanical and plumbing systems, from time to time, before, during and upon completion of the work for which a permit was issued. He/she shall make a record of every such examination and inspection and of all observed violations of the technical codes. Additional regulations in the Florida Building Code, Existing Building may apply.

110.3 *Required inspections.* The building official upon notification from the permit holder or his or her agent, shall make the following inspections, and or any other such inspections as deemed necessary, and shall either release that portion of the construction or shall notify the permit holder or his or her agent of any violations which must be corrected in order to comply with the technical codes. The building official shall determine the timing and sequencing of when inspections occur and what elements are inspected at each inspection. A complete survey or special purpose survey may be required before an inspection is approved.

A. Building

1. Foundation inspection. To be made after trenches are excavated and forms erected and required reinforcing steel is in place and, shall at a minimum include the following building components:

- Stem-wall
- Monolithic slab-on-grade
- Pilings and pile caps
- Footers/grade beams

1.1. Slab/Floor Inspection: Concrete slab and under-floor inspections shall be made after in-slab or under-floor reinforcing steel or framing members installed and all building service equipment, conduit, piping accessories and other ancillary equipment items are in place, but before any concrete is placed or floor sheathing installed, including the subfloor.

1.2 A foundation/Form board survey prepared and certified by a registered surveyor may be required, prior to approval of the slab inspection. The survey shall certify placement of the building on the site, illustrate all surrounding setback dimensions and shall be available at the job site for review by the building inspector. In lieu of providing a survey, the contractor may elect to uncover all property line markers and string-up all property lines in preparation for inspection.

1.23. In flood hazard areas, upon placement of the lowest floor, including basement, and prior to further vertical construction, the elevation certification, required in Section 1612.5, shall be submitted to the building official.

2. Shell Inspections:

2.1. Lintel/tie beams/columns/masonry units. To be made after masonry units, forms, reinforcing steel, shoring, conduit, piping accessories, and other ancillary equipment items are in place, but before any concrete is placed.

2.2. Sheathing inspection. To be made either as part of a dry-in inspection or done separately at the request of the contractor after all roof and wall sheathing and fasteners are complete and shall at a minimum include the following building components:

- Roof sheathing
- Wall sheathing
- Continuous air barrier
- Exterior siding/cladding
- Floor sheathing
- Sheathing fasteners
- Roof/wall dry-in.

- Gypsum board, as required
- ~~Sheathing/cladding inspection~~

NOTE: Sheathing fasteners installed and found to be missing the structural member (shiners) shall be corrected prior to installation of the dry-in material.

3. Roofing inspection. Shall at a minimum be made in at least two inspections and include the following building components:

- Dry-in
- Insulation
- Roof coverings (including In Progress as necessary)
- Insulation on roof deck (according to submitted energy calculation)
- Flashing

3.1 Re-Roof sheathing inspection. An affidavit with a notarized signature of a state or locally licensed roofing contractor for the installation of additional sheathing fasteners as required by the Existing Building Code may be accepted at the discretion of the building official.

4. Framing inspection. To be made after the roof deck or sheathing, all framing, fire blocking and bracing is in place, all concealed wiring, all pipes, chimneys, ducts and vents are complete and shall at a minimum include the following building components:

- Window/door framing and installation.
- Verify rough opening dimensions are within tolerances.
- Window/door buck attachments
- Window U-factor/SHGC as indicated on approved calculations
- Vertical cells/columns complete, if applicable
- Lintel/tie beams complete, if applicable.
- Framing/trusses/bracing/connectors (including truss layout and engineered drawings)
- Draft stopping/fire blocking
- Curtain wall/ bearing wall framing
- Fire resistant assemblies, joints and penetrations, as required
- Accessibility.

5. Insulation Inspection. To be made after the framing inspection is approved and the insulation is in place, according to approved energy calculation submittal. Includes wall and ceiling insulation, thermal and ignition barriers.

6. Lath/Drywall Inspection. Lath and gypsum board inspections shall be made after lathing and gypsum board, interior and exterior, is in place, but before any plastering is applied or gypsum board joints and fasteners are taped and finished.

Exception: Gypsum board that is not part of a fire-resistance- rated assembly or a shear assembly, unless otherwise determined by the building official.

7. Final inspection. To be made after the building is completed, all sub-trade inspections have passed, and ready for occupancy.

7.1. Lowest floor elevation. In flood hazard areas, as part of the final inspection, a final certification of the lowest floor elevation shall be submitted to the authority having jurisdiction.

7.2 A final survey shall be provided to certify placement of the building on the site, illustrate all surrounding setback dimensions, easements, slopes for proper drainage and shall be available at the job site or submitted electronically for review by the building official.

B. Swimming pool inspection.

- First inspection to be made after excavation and installation of reinforcing steel, bonding and main drain, and prior to placing of concrete shell.
- Steel reinforcement inspection
- Underground electric inspection
- Underground piping inspection including a pressure test
- Underground electric inspection under deck area (including the equipotential bonding)
- Underground piping inspection under deck area.
- Deck inspection: to be made prior to installation of the deck material (with forms, deck drains, and any reinforcement in place).
- Final electric inspection to be made prior to filling the swimming pool with water.
- Final permanent barrier inspection is to be made prior to filling the swimming pool with water.
- In order to pass final inspection and receive a certificate of completion, a residential swimming pool must meet the requirements relating to pool safety features as described in Section 424.2.17.
- Final inspection to be made when the swimming pool is complete and all required enclosure requirements are in place.

C. Demolition inspections.

- First inspection (pre-demolition) to be made after all utility connections have been disconnected and secured in such manner that no unsafe or unsanitary conditions shall exist during or after demolition operations
- Final inspection (post-demolition) to be made after all demolition work is completed.
 - Exterior Site Conditions shall be graded and sodded to prevent the accumulation of water and shall be sloped in a manner not create a nuisance to the adjacent properties.

D. Manufactured building inspections.

- The building department shall inspect construction of foundations; connecting buildings to foundations; installation of parts identified on plans as site installed items, joining the modules, including utility crossovers; utility connections from the building to utility lines on site; and any other work done on site which requires compliance with the Florida Building Code (See also Section 107.3.5

Manufactured/Modular Buildings of this code). Additional inspections may be required for public educational facilities (See Section 453.27.20 FBC-Building).

E. Impact-Resistant Coverings or Impact-Resistant Systems Inspections

Where impact-resistant coverings or impact-resistant systems are installed to meet requirements of this code, the building official shall schedule adequate inspections of impact-resistant coverings or impact-resistant systems to determine the following:

- The system indicated on the plans was installed.
- The system is installed in accordance with the manufacturer's installation instructions and the product approval.

F. *Electrical*

1. Underground inspection (including bonding and ground). To be made after trenches or ditches are excavated, conduit or cable is installed, and before any backfill is put in place.
2. Rough-in inspection. To be made after the building is dried-in, framing, fire-blocking and bracing is in place, and prior to the installation of insulation (if applicable), or wall or ceiling membranes.
3. Low Voltage: To be made for security, alarm, elevator, and special uses
4. Power release inspection. To be made after the building electrical system is substantially complete, or completed in phases, with all circuitry installed and electrical fixtures and devices in place, or properly tagged and safed-off.
5. Final inspection. To be made after the building is complete, all required electrical fixtures are in place and properly connected or protected, and the structure is ready for occupancy.
6. Existing Swimming Pools. To be made after all repairs or alterations are complete, all required electrical equipment, GFCI protection, and equipotential bonding are in place on said alterations or repairs.

G. *Plumbing*

1. Underground inspection. To be made after trenches or ditches are excavated, piping is installed, and before any backfill is put in place.
2. Rough-in inspection. To be made after the roof, framing, fire-blocking and bracing is in place and all soil, waste and vent piping is complete, and prior to the installation of insulation (if applicable), or wall or ceiling membranes.
3. Final inspection. To be made after the building is complete, all plumbing fixtures are in place and properly connected, and the structure is ready for occupancy.

Note: See Section 312 of the Florida Building Code, Plumbing for required tests.

H. *Mechanical*

1. Underground inspection. To be made after trenches or ditches are excavated, underground duct and fuel piping is installed, and before any backfill is put in place.
2. Rough-in inspection. To be made after the building is dried-in, framing, fire blocking and bracing are in place and all ducting, and other concealed components are complete, and prior to the installation of insulation (if applicable), or wall or ceiling membranes.

Includes mechanical provisions of the energy code and approved calculation provisions.

3. Final inspection. To be made after the building is complete, the mechanical system is in place and properly connected, and the structure is ready for occupancy.

I. Gas

1. Rough piping and tank inspection. To be made after all new piping authorized by the permit has been installed, and before any such piping has been covered or concealed or any fixtures or gas appliances have been connected.
2. Final piping inspection. To be made after all piping authorized by the permit has been installed and after all portions which are to be concealed by plastering or otherwise have been so concealed, and before any fixtures or gas appliances have been connected. This inspection shall include a pressure test.
3. Final inspection. To be made on all new gas work authorized by the permit and such portions of existing systems as may be affected by new work or any changes, to ensure compliance with all the requirements of this code and to assure that the installation and construction of the gas system is in accordance with reviewed plans.

J. Site Debris

1. The contractor and/or owner of any active or inactive construction project shall be responsible for the clean-up and removal of all construction debris or any other miscellaneous discarded articles prior to receiving final inspection approval. Construction job sites must be kept clean and in a safe condition at all times. (See also Section 110.9 of this code)
2. All debris shall be kept in such a manner as to prevent it from being spread by any means.

110.3.1 *Footing and foundation inspection.* Footing and foundation inspections shall be made after excavations for footings are complete and any required reinforcing steel is in place. For concrete foundations, any required forms shall be in place prior to inspection. Materials for the foundation shall be on the job, except where concrete is ready mixed in accordance with ASTM C 94, the concrete need not be on the job. (See also Section 110.3 of this code)

110.3.2 *Concrete slab and under-floor inspection.* (Reserved). (See Section 110.3, (A) Building (1) (1.1) of this code).

110.3.3 *Lowest Floor Elevation.* (Reserved). (See Section 110.3, (A) Building (1) (1.2) of this code).

110.3.4 *Frame Inspection.* (Reserved). (See Section 110.3, (A) Building (4) of this code).

110.3.5 *Lath and Gypsum Board Inspection.* (Reserved). (See Section 110.3, (A) Building (6) of this code).

110.3.6 *Weather-exposed balcony and walking surface waterproofing.* Where balcony or other elevated walking surfaces are exposed to water from direct or blowing rain, snow or irrigation, and the structural framing is protected by an impervious moisture barrier, all elements of the impervious-moisture-barrier system shall not be concealed until inspected and approved.

110.3.7 *Fire- and smoke-resistant penetrations.* Protection of joints and penetrations in fire-resistance-rated assemblies, smoke barriers and smoke partitions shall not be concealed from view until inspected and approved by the Building Official.

110.3.8 *Energy efficiency inspections.* Inspections shall be made to determine compliance with FBC, Energy Conservation and confirm with the approved energy code submittal (by appropriate trade) and corresponding mandatory requirements and shall include, but not be limited to, inspections for: corresponding envelope insulation R- and U-values, fenestration U-value and Solar Heat Gain Coefficient, duct system R-value, and HVAC, lighting, electrical and water-heating equipment efficiency.

110.3.9 Other inspections. In addition to the inspections specified in Sections 110.3 through 110.3.7 of this code, the building official is authorized to make or require other inspections of any construction work to ascertain compliance with the provisions of this code and other laws that are enforced by the Building Division.

110.3.10 Special Inspections. Resered.

110.3.11 *Final Inspections prior to issuance of Certificate of Occupancy or Completion.* The building official shall inspect or cause to be inspected, at various intervals, all construction or work for which a permit is required, and a final inspection shall be made of every building, structure, electrical, gas, mechanical or plumbing system upon completion, prior to the issuance of the Certificate of Occupancy or Certificate of Completion. In performing inspections, the building official shall give first priority to inspections of the construction, addition, or renovation to, any facilities owned or controlled by a state university, state community college or public school district.

110.3.11.1 Flood hazard documentation for properties located in a flood hazard area, all required documentation shall be submitted to the building official at the time of the final inspection.

110.3.11.2 Energy Code documentation. As required by Section C408.2.4.1 of the Energy Conservation Volume, confirmation that the preliminary commissioning report has been received by building owner shall be provided at the time of final mechanical inspection.

110.3.12 *Termites.* Building components and building surroundings required to be protected from termite damage in accordance with Section 1503.7 of this code, Section 2304.12.9 of this code or Section 2304.12.4 of this code, specifically required to be inspected for termites in accordance with Section 2114 of this code, or required to have chemical soil treatment in accordance with Section 1816 of this code shall not be covered or concealed until the release from the building official has been received. (Also refer to Sections 105.10 and 105.11 of this code)

110.3.13 *Impact Resistant coverings or systems.* Where impact resistant coverings or systems are installed to meet requirements of this code, the Building Official shall schedule adequate inspections of impact resistant coverings or systems to determine the following:

1. The system indicated on the plans was installed.
2. The system is installed in accordance with the manufacturer's installation instructions and the product approval.

110.3.14 *Reinforcing steel and structural frames.* Reinforcing steel or structural frame work of any part of any building or structure shall not be covered or concealed without first obtaining a release from the building official. Certification that field welding and structural bolted connections meet design requirements shall be submitted to the building official, upon request.

110.4 *Inspection agencies.* The building official is authorized to accept reports of approved inspection agencies, provided such agencies satisfy the requirements as to qualifications and reliability.

110.5 *Inspection requests.* It shall be the duty of the holder of the building permit or their duly authorized agent to notify the building official when work is ready for inspection. It shall be the duty of the permit holder to provide access to and means for inspections of such work that are required by this code.

110.6 *Approval required.* Work shall not be done beyond the point indicated in each successive inspection without first obtaining the approval of the building inspector. The building official,

upon notification, shall make the requested inspections and shall either indicate the portion of the construction that is satisfactory as completed, or notify the permit holder or his or her agent wherein the same fails to comply with this code. Any portions that do not comply shall be corrected and such portion shall not be covered or concealed until authorized by the building official.

110.7 *Shoring.* For threshold buildings, shoring and associated formwork or falsework shall be designed and inspected by a Florida registered professional engineer, employed by the permit holder or subcontractor, prior to any required mandatory inspections by the threshold building inspector.

110.8 *Threshold building.*

110.8.1 The enforcing agency shall require a special inspector to perform structural inspections on a threshold building pursuant to a structural inspection plan prepared by the engineer or architect of record. The structural inspection plan must be submitted to the enforcing agency prior to the issuance of a building permit for the construction of a threshold building. The purpose of the structural inspection plans is to provide specific inspection procedures and schedules so that the building can be adequately inspected for compliance with the permitted documents. The special inspector may not serve as a surrogate in carrying out the responsibilities of the building official, the architect or the engineer of record. The contractor's contractual or statutory obligations are not relieved by any action of the special inspector.

110.8.2 The special inspector shall determine that a professional engineer who specializes in shoring design has inspected the shoring and reshoring for conformance with the shoring and reshoring plans submitted to the enforcing agency. A fee simple title owner of a building, which does not meet the minimum size, height, occupancy, occupancy classification or number-of-stories criteria which would result in classification as a threshold building under Florida Statute 553.71(7), may designate such building as a threshold building, subject to more than the minimum number of inspections required by the Florida Building Code.

110.8.3 The fee owner of a threshold building shall select and pay all costs of employing a special inspector, but the special inspector shall be responsible to the enforcement agency. The inspector shall be a person certified, licensed or registered under Chapter 471, Florida Statutes, as an engineer or under Chapter 481, Florida Statutes, as an architect.

110.8.4 Each enforcement agency shall require that, on every threshold building:

110.8.4.1 The special inspector, upon completion of the building and prior to the issuance of a certificate of occupancy, file a signed and sealed statement with the enforcement agency in substantially the following form: "To the best of my knowledge and belief, the above described construction of all structural load-bearing components complies with the permitted documents, and the shoring and reshoring conforms to the shoring and reshoring plans submitted to the enforcement agency."

110.8.4.2 Any proposal to install an alternate structural product or system to which building codes apply shall be submitted to the enforcement agency for review for compliance with the codes and made part of the enforcement agency's recorded set of permit documents.

110.8.4.3 All shoring and reshoring procedures, plans and details shall be submitted to the enforcement agency for recordkeeping. Each shoring and reshoring installation shall be supervised, inspected and certified to be in compliance with the shoring documents by the contractor.

110.8.4.4 All plans for the building which are required to be signed and sealed by the architect or engineer of record contain a statement that, to the best of the architect's or engineer's knowledge, the plans and specifications comply with the applicable

minimum building codes and the applicable fire- safety standards as determined by the local authority in accordance with this section and Chapter 633, Florida Statutes.

110.8.5 No enforcing agency may issue a building permit for construction of any threshold building except to a licensed general contractor, as defined in Section 489.105(3)(a), Florida Statutes, or to a licensed building contractor, as defined in Section 489.105(3)(b), Florida Statutes, within the scope of her or his license. The named contractor to whom the building permit is issued shall have the responsibility for supervision, direction, management and control of the construction activities on the project for which the building permit was issued.

110.8.6 The building division may allow a special inspector to conduct the minimum structural inspection of threshold buildings required by this code, Section 553.73, Florida Statutes, without duplicative inspection by the Building Division. The Building Official is responsible for ensuring that any person conducting inspections is qualified as a building inspector under Part XII of Chapter 468, Florida Statutes, or certified as a special inspector under Chapter 471 or 481, Florida Statutes. Inspections of threshold buildings required by Section 553.79(5), Florida Statutes, are in addition to the minimum inspections required by Section 110.3 this code.

110.9 *Impact of construction.* All construction activity regulated by this code shall be performed in a manner so as not to adversely impact the condition of adjacent property, unless such activity is permitted to affect said property pursuant to a consent granted by the applicable property owner, under terms or conditions agreeable to the applicable property owner. This includes, but is not limited to, the control of dust, noise, water or drainage run-offs, debris, and the storage of construction materials. New construction activity shall not adversely impact legal historic surface water drainage flows serving adjacent properties, and may require special drainage design complying with engineering standards to preserve the positive drainage patterns of the affected sites. Accordingly, developers, contractors and owners of all new residential development, including additions, pools, patios, driveways, decks or similar items, on existing properties resulting in a significant decrease of permeable land area on any parcel or has altered the drainage flow on the developed property shall, as a permit condition, provide a professionally prepared drainage plan clearly indicating compliance with this paragraph. Upon completion of the improvement, a certification from a licensed professional shall be submitted to the inspector in order to receive approval of the final inspection.

110.10 Special Building Inspector.

110.10.1 The Building Official may require the owner to employ a special inspector for the inspection of the structural framework, or any part thereof, as herein required:

110.10.1.1 Buildings or structures or part thereof of unusual size, height, design or method of construction and critical structural connections.

1. Placement of Piling.
2. Windows, glass doors, external protection devices and curtain walls on buildings over two (2) stories.
3. The method or pace of construction requires continuous inspection.
4. In the opinion of the Building Official, any other additional inspections that are required.

110.10.2 The Building Official shall require the owner to employ a special building inspector for the inspections herein required:

110.10.2.1 Precast Concrete Units.

110.10.2.2 Reinforced unit masonry.

110.10.2.3 Connections.

110.10.2.4 Metal Building Systems.

110.10.2.5 Smoke Control Systems.

110.10.3 The person employed by the owner as a Special Building Inspector shall be subject to verification of qualifications by the Building Official or Building Official's designee, as applicable.

110.10.4 The Building Official or Building Official's designee, as applicable shall require that the Architect or Engineer of record submit an inspection plan which shall specify the scope and nature of inspections to be performed. The special building inspector or their authorized representative shall make all inspections in accordance with the approved inspection plan.

110.10.5 Special building inspector shall be an Architect or Engineer or their duly authorized representative.

Exception 1: Building Inspectors (structural) certified by BORA who have satisfactorily an approved masonry course may perform inspections of Reinforced Unit Masonry and any precast lintels incorporated into such masonry for Residential Occupancy and Group R-3 Occupancy.

Exception 2: Special building inspector for Smoke control systems shall meet the qualifications required in FBC 909.18.8.2.

110.10.6 The special building inspector shall be responsible for compliance with the applicable portions of the permitted construction documents as delineated in the special building inspection plan and shall submit progress reports and inspection reports to the Building Official's designee as applicable, for submittal to the Building Official. Structural inspections performed by the special building inspector shall satisfy the requirements for mandatory inspections by the FBC.

110.10.6.1 A log of all progress reports and inspection reports shall be maintained at the job site.

110.10.6.2 Signed and Sealed progress reports and inspection reports shall be submitted to the Building Official's designee, as applicable; for submittal to the Building Official on a weekly basis.

Exception: The Building Official shall determine the frequency for the submitting of progress reports for Smoke Control Systems.

110.10.6.3 The municipality shall monitor the progress of the special building inspector on a regular basis.

110.10.7 At the completion of the work, the special building inspector shall submit a signed and sealed Certificate of Compliance to the Building Official's designee, as applicable for submittal to the Building Official, stating that the work was done, substantially in accordance with the applicable portions of the permitted construction documents as delineated in the special building inspection plan.

Exception: Reports for Smoke Control Systems shall comply with FBC 909.18.8.3 Reports, and FBC 909.18.8.3.1 Report filing.

110.11 Clean-up of Construction Site. Upon completion of the proposed work, the permit holder shall leave the construction site cleared of rubbish, debris, construction sheds or materials of construction. In the event there has been damage to public property or that rubbish, debris, construction sheds or materials of construction have been left at the construction site, then the Building Official shall refuse to make final inspection and shall notify the permit holder to correct the condition of violation with five (5) days. For failure to comply with such notice after such period of five (5) days, the permit holder is subject to the penalties specified herein, and the Building Official shall have the clean-up work done and public property restored and shall notify the legal authority, who shall institute the necessary action to have the costs placed as a lien against the property in relation to which the permit was issued.

110.12 Mandatory structural inspections for condominium and cooperative buildings.

110.12.1 General. The Legislature finds that maintaining the structural integrity of a building throughout the life of the building is of paramount importance in order to ensure that buildings are structurally sound so as to not pose a threat to the public health, safety, or welfare. As such, the Legislature finds that the imposition of a statewide structural inspection program for aging condominium and cooperative buildings in this state is necessary to ensure that such buildings are safe for continued use.

110.12.2. As used in this section, the terms:

(a) "Milestone inspection" means a structural inspection of a building, including an inspection of load-bearing elements and the primary structural members and primary structural systems as those terms are defined in s. 627.706, Florida Statutes, by an architect licensed under chapter 481 or engineer licensed under chapter 471 authorized to practice in this state for the purposes of attesting to the life safety and adequacy of the structural components of the building and, to the extent reasonably possible, determining the general structural condition of the building as it affects the safety of such building, including a determination of any necessary maintenance, repair, or replacement of any structural component of the building. The purpose of such inspection is not to determine if the condition of an existing building is in compliance with the Florida Building Code or the firesafety code. The milestone inspection services may be provided by a team of professionals with an architect or engineer acting as a registered design professional in responsible charge with all work and reports signed and sealed by the appropriate qualified team member.

(b) "Substantial structural deterioration" means substantial structural distress or substantial structural weakness that negatively affects a building's general structural condition and integrity. The term does not include surface imperfections such as cracks, distortion, sagging, deflections, misalignment, signs of leakage, or peeling of finishes unless the licensed engineer or architect performing the phase one or phase two inspection determines that such surface imperfections are a sign of substantial structural deterioration.

110.12.3. (a) An owner or owners of a building that is three stories or more in height as determined by the Florida Building Code and that is subject, in whole or in part, to the condominium or cooperative form of ownership as a residential condominium under chapter 718, Florida Statutes, or a residential cooperative under chapter 719, Florida Statutes, must have a milestone inspection performed by December 31 of the year in which the building reaches 30 years of age, based on the date the certificate of occupancy for the building was issued, and every 10 years thereafter. If a building reached 30 years of age before July 1, 2022, the building's initial milestone inspection must be performed before December 31, 2024. If a building reaches 30 years of age on or after July 1, 2022, and before December 31, 2024, the building's initial milestone inspection must be performed before December 31, 2025. If the date of issuance for

the certificate of occupancy is not available, the date of issuance of the building's certificate of occupancy shall be the date of occupancy evidenced in any record of the local building official.

- (b) The local enforcement agency may determine that local circumstances, including environmental conditions such as proximity to salt water as defined in s. 379.101, require that a milestone inspection must be performed by December 31 of the year in which the building reaches 25 years of age, based on the date the certificate of occupancy for the building was issued, and every 10 years thereafter.
- (c) The local enforcement agency may extend the date by which a building's initial milestone inspection must be completed upon a showing of good cause by the owner or owners of the building that the inspection cannot be timely completed if the owner or owners have entered into a contract with an architect or engineer to perform the milestone inspection and the inspection cannot reasonably be completed before the deadline or other circumstance to justify an extension.
- (d) The local enforcement agency may accept an inspection report prepared by a licensed engineer or architect for a structural integrity and condition inspection of a building performed before July 1, 2022, if the inspection and report substantially comply with the requirements of this section. Notwithstanding when such inspection was completed, the condominium or cooperative association must comply with the unit owner notice requirements in Section 110.9.9. The inspection for which an inspection report is accepted by the local enforcement agency under this paragraph is deemed a milestone inspection for the applicable requirements in chapters 718 and 719. If a previous inspection and report is accepted by the local enforcement agency under this paragraph, the deadline for the building's subsequent 10-year milestone inspection is based on the date of the accepted previous inspection.

110.12.4. The milestone inspection report must be arranged by a condominium or cooperative association and any owner of any portion of the building which is not subject to the condominium or cooperative form of ownership. The condominium association or cooperative association and any owner of any portion of the building which is not subject to the condominium or cooperative form of ownership are each responsible for ensuring compliance with the requirements of this section. The condominium association or cooperative association is responsible for all costs associated with the milestone inspection attributable to the portions of a building which the association is responsible to maintain under the governing documents of the association. This section does not apply to a single-family, two-family, or three-family dwelling with three or fewer habitable stories above ground.

110.12.5. Upon determining that a building must have a milestone inspection, the local enforcement agency must provide written notice of such required inspection to the condominium association or cooperative association and any owner of any portion of the building which is not subject to the condominium or cooperative form of ownership, as applicable, by certified mail, return receipt requested. The condominium or cooperative association must notify the unit owners of the required milestone inspection within 14 days after receipt of the written notice from the local enforcement agency and provide the date that the milestone inspection must be completed. Such notice may be given by electronic submission to unit owners who consent to receive notice by electronic submission or by posting on the association's website.

110.12.6. Phase one of the milestone inspection must be completed within 180 days after the owner or owners of the building receive the written notice under Section 110.9.5. For purposes of this section, completion of phase one of the milestone inspection means the licensed engineer or architect who performed the phase one inspection submitted the inspection report by e-mail, United States Postal Service, or commercial delivery service to the local enforcement agency.

110.12.7. A milestone inspection consists of two phases:

110.12.7.1. For phase one of the milestone inspection, a licensed architect or engineer authorized to practice in this state shall perform a visual examination of habitable and nonhabitable areas of a building, including the major structural components of a building, and provide a qualitative assessment of the structural conditions of the building. If the architect or engineer finds no signs of substantial structural deterioration to any building components under visual examination, phase two of the inspection, as provided in Section 110.9.7.2, is not required. An architect or engineer who completes a phase one milestone inspection shall prepare and submit an inspection report pursuant to Section 110.9.8.

110.12.7.2. A phase two of the milestone inspection must be performed if any substantial structural deterioration is identified during phase one. A phase two inspection may involve destructive or nondestructive testing at the inspector's direction. The inspection may be as extensive or as limited as necessary to fully assess areas of structural distress in order to confirm that the building is structurally sound and safe for its intended use and to recommend a program for fully assessing and repairing distressed and damaged portions of the building. When determining testing locations, the inspector must give preference to locations that are the least disruptive and most easily repairable while still being representative of the structure. If a phase two inspection is required, within 180 days after submitting a phase one inspection report the architect or engineer performing the phase two inspection must submit a phase two progress report to the local enforcement agency with a timeline for completion of the phase two inspection. An inspector who completes a phase two milestone inspection shall prepare and submit an inspection report pursuant to Section 110.9.8.

110.12.8. Upon completion of a phase one or phase two milestone inspection, the architect or engineer who performed the inspection must submit a sealed copy of the inspection report with a separate summary of, at minimum, the material findings and recommendations in the inspection report to the condominium association or cooperative association, to any other owner of any portion of the building which is not subject to the condominium or cooperative form of ownership, and to the building official of the local government which has jurisdiction. The inspection report must, at a minimum, meet all of the following criteria:

- (a) Bear the seal and signature, or the electronic signature, of the licensed engineer or architect who performed the inspection.
- (b) Indicate the manner and type of inspection forming the basis for the inspection report.
- (c) Identify any substantial structural deterioration, within a reasonable professional probability based on the scope of the inspection, describe the extent of such deterioration, and identify any recommended repairs for such deterioration.
- (d) State whether unsafe or dangerous conditions, as those terms are defined in the Florida Building Code, were observed.
- (e) Recommend any remedial or preventive repair for any items that are damaged but are not substantial structural deterioration.
- (f) Identify and describe any items requiring further inspection.

110.12.9. Within 45 days after receiving the applicable inspection report, the condominium or cooperative association must distribute a copy of the inspector-prepared summary of the inspection report to each condominium unit owner or cooperative unit owner, regardless of the findings or recommendations in the report, by United States mail or personal delivery at the mailing address, property address, or any other address of the owner provided to fulfill the

association's notice requirements under chapter 718 or chapter 719, as applicable, and by electronic transmission to the e-mail address or facsimile number provided to fulfill the association's notice requirements to unit owners who previously consented to received notice by electronic transmission; must post a copy of the inspector-prepared summary in a conspicuous place on the condominium or cooperative property; and must publish the full report and inspector- prepared summary on the association's website, if the association is required to have a website.

110.12.10. A local enforcement agency may prescribe timelines and penalties with respect to compliance with this section.

110.12.11. A board of county commissioners or municipal governing body may adopt an ordinance requiring that a condominium or cooperative association and any other owner that is subject to this section schedule or commence repairs for substantial structural deterioration within a specified timeframe after the local enforcement agency receives a phase two inspection report; however, such repairs must be commenced within 365 days after receiving such report. If an owner of the building fails to submit proof to the local enforcement agency that repairs have been scheduled or have commenced for substantial structural deterioration identified in a phase two inspection report within the required timeframe, the local enforcement agency must review and determine if the building is unsafe for human occupancy.

Section 111. *Certificates of Occupancy and Completion.*

111.1 *Use and Occupancy.* No building or structure shall be used or occupied, and no change in the existing occupancy classification of a building or structure or portion thereof shall be made, until the building official has issued a Certificate of Occupancy therefore as provided herein. Issuance of a Certificate of Occupancy shall not be construed as an approval of a violation of the provisions of this code or of other ordinances of the jurisdiction. Said certificate shall not be issued until all required electrical, gas, mechanical, plumbing and fire protection systems have been inspected for compliance with the technical codes and other applicable laws and ordinances and released by the building official.

Exception: Certificates of occupancy are not required for work exempt from permits under Section 105.2 of this code

111.2 *Certificate issued.* After the building official inspects the building or structure and finds no violations of the provisions of this code or other laws that are enforced by the building department or other agency whose approval is inherent in the building permitting process, the building official shall issue a Certificate of Occupancy that contains the following:

1. The building permit number.
2. The address of the structure.
3. The name and address of the owner.
4. A description of that portion of the structure for which the certificate is issued.
5. A statement that the described portion of the structure has been inspected for compliance with the requirements of this code for the occupancy and division of occupancy and the use for which the proposed occupancy is classified.
6. For buildings and structures in flood hazard areas, a statement that documentation of the as-built lowest floor elevation has been provided and is retained in the records of the building department.
7. The name of the building official.

8. The edition of the code under which the permit was issued.
 9. The use and occupancy, in accordance with the provisions of Chapter 3 of this code.
 10. The type of construction as defined in Chapter 6 of this code.
 11. The design occupant load.
 12. If an automatic sprinkler system is provided, whether the sprinkler system is required.
 13. Any special stipulations and conditions of the building permit.
- 111.3 *Temporary/partial occupancy.* A temporary/partial Certificate of Occupancy or Certificate of Completion may be issued for a portion or portions of a building that may safely be occupied prior to final completion of the building. The building official may require, once all life safety issues have been complied with, an applicant to provide adequate cash surety for unfinished work or revision of plans until a permanent Certificate of Occupancy or Certificate of Completion is granted. The purpose of the cash surety is to insure completion of work under this permit. Such cash surety shall be equal to one hundred ten percent (110%) of the estimated value of the remaining work, including labor and material, as determined by the design professional. The design professional shall submit a signed and sealed document attesting to the amount required to cover the cash surety. If work has not been completed and all finals requested within 90 days of issuance of the initial Temporary/Partial Certificate of Occupancy or Certificate of Completion, the jurisdiction retains the right to have the applicant surrender the cash surety. The jurisdiction then may use the surety to finish the remaining work. The surety shall be in the form of cash money, certified check, or cashier's check. Surety shall be returned upon approval of all final inspections and upon written request that has been approved by the building official. This provision is only for the Florida Building Code; all other Agency approvals necessary for construction must be secured prior to this provision being applied.
- 111.4 *Revocation.* The building official is authorized to, in writing, suspend or revoke a Certificate of Occupancy or Completion issued under the provisions of this code wherever the certificate is issued in error, or on the basis of incorrect information supplied, or where it is determined that the building or structure or portion thereof is in violation of any ordinance or regulation or any of the provisions of this code.
- 111.5 *Certificate of Completion.* Upon satisfactory completion of a building, structure, electrical, gas, mechanical or plumbing system, a Certificate of Completion may be issued. This certificate is proof that a structure or system is complete and for certain types of permits is released for use and may be connected to a utility system. This certificate does not grant authority to occupy or connect a building, such as a shell building, prior to the issuance of a Certificate of Occupancy.
- 111.6 *Fixturing and Stocking.* The Building Official is authorized to issue approval for fixturing, stocking, training, or decorating, when appropriate, to allow the builder to prepare the structure for permanent occupancy. The building may not open to the general public or be used for the transaction of any commerce. Such approval must be conditioned upon the approval of the Fire Marshal, when applicable.
- 111.7 *Digital Submittal Requirements for New Construction.*
- 111.7.1 *Building Footprints.* The Building Official is authorized to require the submittal of digital shape (CAD) files, in a specific format, depicting a geo-referenced footprint with elevation for all new structures as a condition of the issuance of a Certificate of Occupancy.
 - 111.7.2 *Subdivision Topography.* The Building Official is authorized to require the submittal of electronic topographical data for all new subdivisions over 5 acres or 5 lots for the purposes of updating and maintaining the community's flood maps.

Section 112. *Service Utilities.*

- 112.1 *Connection of service utilities.* No person shall make connections from a utility, source of energy, fuel or power to any building or system that is regulated by this code for which a permit is required, until released by the building official and a Certificate of Occupancy or Completion is issued. The servicing utility company shall not connect the power supply until notified by the building official or his/her duly authorized designee.
- 112.2 *Temporary connection.* The building official shall have the authority to authorize the temporary connection of the building or system to the utility source of energy, fuel or power for the purpose of testing building service systems or for use under a temporary Certificate of Occupancy.
- 112.2.1 *Energizing Systems.* It shall be unlawful for any person, firm or corporation to energize any wiring system or portion thereof until the electrical work has been inspected and approved and the responsible person, firm or corporation is authorized by the appropriate governmental jurisdiction to energize the system.
- 112.3 *Authority to disconnect service utilities.* The building official shall have the authority to authorize disconnection of utility service to the building, structure or system regulated by this code and the referenced codes and standards set forth in Section 101.4 in case of emergency where necessary to eliminate an immediate hazard to life, or property, or unsafe condition, or when such utility connection has been made without the approval required by Section 112.1 or 112.2. The building official shall notify the serving utility, and whenever possible the owner and occupant of the building, structure, or service system of the decision to disconnect prior to taking such action. If not notified prior to disconnecting, the owner or occupant of the building, structure, or service system shall be notified in writing, as soon as practical thereafter.

Section 113. *Appeals and Variances.*

113.1 *Appeals*

- 113.1.1 *Decision of the building official.* The owner of a building, structure or service system, or duly authorized agent, may appeal a decision of the building official to the Florida Building Commission pursuant to Florida State Statute 553.775 whenever any one of the following conditions are claimed to exist:
1. The building official rejected or refused to approve the mode or manner of construction proposed to be followed or materials to be used in the installation or alteration of a building, structure or service system.
 2. The provisions of this code do not apply to this specific case.
 3. That an equally good or more desirable form of installation can be employed in any specific case, which the building official has rejected or refused.
 4. The true intent and meaning of this code or any of the regulations hereunder have been misconstrued or incorrectly interpreted.
- 113.2 *Variances.* The Planning and Zoning Board, as established in the Town Code, when upon written request by an Applicant, may vary the application of any provision of this code to any particular case when, in its opinion, the enforcement thereof would do manifest injustice and would be contrary to the spirit and purpose of this or the technical codes or public interest. The board shall have no authority to waive requirements of this code. Review and recommendation by the Building Official to the Board is required. Application must also adhere to the Town Code criteria for Variance applications.
- 113.4.2.1 *Conditions of the variance.* In granting the variance, the Board may prescribe a reasonable time limit within which the action for which the variance is required shall be commenced or completed or both. In addition, the Board may prescribe appropriate conditions and safeguards in conformity with this code. Violation of the conditions of a variance shall be deemed a violation of this code.

Section 114. *Violations.*

Any person, firm, corporation or agent who shall fail to comply with a provision of this code, or, or with any of the requirements thereof, or who shall erect, construct, alter, install, demolish or move any structure, electrical, gas, mechanical or plumbing system, or has erected, constructed, altered, repaired, moved or demolished a building, structure, electrical, gas, mechanical or plumbing system, without full compliance with applicable codes, laws, ordinances, rules and regulations, shall be guilty of a violation. Each such person shall be considered guilty of a separate offense for each and every day or portion thereof during which any violation of any of the provisions of applicable codes, laws, ordinances, rules and regulations is committed or continued, and upon conviction of any such violation such person shall be punished within the limits and as provided by state laws. Nothing in this section shall prevent the Town from imposing fines, liens, or seek injunction relief, or exercising other enforcement powers as permitted by law. Code enforcement and penalties of Chapter 162 F.S. Part I shall be authorized if building work begins without payment of all required fees, and for the purposes of enforcing this code, code officials licensed under Chapter 468, F.S., Part XII are deemed "Code Inspectors", as defined in Section 162.04, F.S.

Section 115. *Stop Work Order.*

- 115.1 *Stop work orders.* Upon notice from the building official, work on any building, structure, electrical, gas, mechanical or plumbing system that is being done contrary to the provisions of this code or in a dangerous or unsafe manner, shall immediately cease.
- 115.2 *Issuance.* The stop work order shall be in writing and shall be given to the owner of the property involved, or to the owner's agent, or to the person doing the work. Upon issuance of a stop work order, the cited work shall immediately cease. The stop work order shall state the reason for the order, and the conditions under which the cited work will be permitted to resume. Where an emergency exists, the building official shall not be required to give a written notice prior to stopping the work.
- 115.3 *Unlawful continuance.* Any person who shall continue any work after having been served with a stop work order, except such work as that person is directed to perform to remove a violation or unsafe condition, shall be subject to penalties as prescribed by law.

Section 116. *Unsafe Structures and Equipment.*

- 116.1 *Unsafe buildings or systems.* All buildings, structures, electrical, gas, mechanical or plumbing systems which are unsafe, unsanitary, or do not provide adequate egress, or which constitute a fire hazard, or are otherwise dangerous to human life, or which in relation to existing use, constitute a hazard to safety or health, are considered unsafe buildings or service systems. All such unsafe buildings, structures or service systems are hereby declared illegal and shall be ordered by the building official to be abated by the owner, through repair and rehabilitation or by demolition in accordance with the this Code. The extent of repairs shall be determined by the building official.
- 116.1.1 When the building official determines a building, structure, electrical, gas, mechanical or plumbing system or portion thereof is unsafe, as set forth in this Code he/she shall provide the owner, agent or person in control of such building, structure, electrical, gas, mechanical or plumbing system a written notice of violation stating the defects thereof. This notice shall require the owner within a stated time either to complete specified repairs or improvements, or to demolish and remove the building, structure, electrical, gas, mechanical or plumbing system or portion thereof. At the option of the Town, the processes and procedures for code enforcement under Chapter 162 F.S. may be utilized to abate a violation under this section. If this statutory method of enforcement is invoked, the building official shall act in the role of code inspector to initiate enforcement proceedings, and notice shall be in accordance with the provisions of the Statute.
- 116.1.2 If necessary, the notice shall also require the building, structure, electrical, gas, mechanical, plumbing systems or portion thereof to be vacated and/or disconnected, and not reoccupied and/or reconnected until the specified repairs and improvements are

completed, inspected and approved by the building official. The building official shall post at each entrance to the building a placard stating: THIS BUILDING IS UNSAFE AND ITS USE OR OCCUPANCY HAS BEEN PROHIBITED BY THE BUILDING OFFICIAL. This placard shall remain posted until the required repairs are made or demolition is completed. It shall be unlawful for any person, firm or corporation or its officers, agents, or other servants, to remove the posting without written permission of the building official, or for any person to enter the building, or use the building or system(s) except for the purpose of making the required repairs or of demolishing same.

- 116.1.3 In case the owner, agent, or person in control cannot be found within the stated time limit, or, if such owner, agent, or person in control shall fail, neglect, or refuse to comply with notice to repair, rehabilitate, or to demolish, and remove said building, structure, electrical, gas, mechanical or plumbing system or portion thereof, the building official, acting as a code inspector, shall notify an enforcement board or special magistrate and request a hearing. In the case of the violation posing a serious threat, and after having ascertained the cost, the building official may take action to cause such building, structure, electrical, gas, mechanical or plumbing system or portion thereof, to be demolished, secured, repaired, or required to remain vacant or unused. Taking such action does not create a continuing obligation on the part of the building official or the Town to continue with maintaining such building, structure, or system; or create liability for any damage to the property.
- 116.1.4 The decision of the building official shall be final in cases of emergency, which, in the opinion of the building official, involve imminent danger to human life or health, or the property of others. He/she shall promptly cause such building, structure, electrical, gas, mechanical or plumbing system or portion thereof to be made safe or cause its removal. For this purpose he/she may at once enter such structure or land on which it stands, or abutting land or structures, with such assistance and at such cost as he may deem necessary. He/she may order the vacating of adjacent structures and may require the protection of the public by appropriate fence or such other means as may be necessary, and for this purpose may close a public or private way.
- 116.2 *Enforcement proceedings; hearings.* Violation proceedings and hearings for unsafe structures and equipment will be conducted before the code enforcement board or special magistrate in accordance with the provisions set forth in Chapter 162, F.S.. The owner of property that is subject to an enforcement proceeding before an enforcement board, special magistrate, or court is required to make disclosures as outlined in Chapter 162, F.S. before a transfer of property, and failure to make the required disclosures creates a presumption of fraud.
- 116.3 *Administrative fines; costs to repair; liens.* All costs associated with taking a case before the enforcement board or special magistrate shall be recovered where the Town prevails. Whenever one of the orders of the enforcement board or the special magistrate has not been complied with by the time set for compliance, for each day thereafter during which each violation continues past the date set for compliance, the enforcement board or the special magistrate may impose a fine. All costs incurred as a result of actions taken per Section 116.1.3 are charged to the violator. A certified copy of an order imposing a fine, or a fine plus repair, and the costs of prosecuting the case, may be recorded in the public records and shall thereafter constitute a lien against the land where the violation exists and upon any other real or personal property owned by the violator.
- 116.4 *Appeal.* An aggrieved party, including the Town, may appeal a final administrative order of an enforcement board or special magistrate to the circuit court. Such an appeal shall not be a hearing de novo but shall be limited to appellate review of the record created before the enforcement board. An appeal shall be filed within 30 days of the execution of the order to be appealed.

Section 117. *Variances In Flood Hazard Areas.*

117.1 *Flood hazard areas.* Pursuant to Section 553.73(5), Florida Statutes, the variance procedures adopted in the local floodplain management ordinance shall apply to requests submitted to the Building Official for variances to the provisions of Section 1612.4 of the Florida Building Code, Building or, as applicable, the provisions of R322 of the Florida Building Code, Residential. This section shall not apply to Section 3109 of the Florida Building Code, Building.

Section 118. *Reserved.*

Section 119. *Severability.*

If any section, subsection, sentence, clause or phrase of this code is for any reason held to be unconstitutional, such decision shall not affect the validity of the remaining portions of this code.

(Code 1978, § 7-18; Ord. No. 12-1991, § 2, 8-20-1991; Ord. No. 27-1993, § II, 12-15-1993; Ord. No. 3-1996, § II, 2-21-1996; Ord. No. 3-2005, § 3(7-18), 7-20-2005; Ord. No. 14-2007, § 3, 8-1-2007; Ord. No. 04-2012, § 1, 4-4-2012; Ord. No. 09-2015, § 1, 8-5-2015)

Sec. 54-8.1. - Establishment of wind speed lines.

As required by paragraph 1609.3 of the Florida Building Code, wind speed lines in the area of jurisdiction of the town are hereby established as set forth on the basic wind speed map, which is hereby adopted and incorporated as if fully set forth in this section, of which copies have been and are now filed in the office of the building official of the town. Pursuant to Figures 1609A, B and C of the Florida Building Code, design wind speeds are as follows:

Category I buildings: 160 mph

Category II buildings: 170 mph

Category III and IV buildings: 180 mph

(Ord. No. 04-2012, § 1, 4-4-2012; Ord. No. 09-2015, § 1, 8-5-2015)

Sec. 54-8.2. - National Electrical Code adopted.

The most current edition of the National Electrical Code, of which copies have been and are now filed in the office of the building official of the town, is hereby adopted and incorporated as if set forth at length in this section.

(Ord. No. 04-2012, § 1, 4-4-2012; Ord. No. 09-2015, § 1, 8-5-2015)

Secs. 54-9—54-30. - Reserved.
